**2020**  
Interim  
Report

# SECTION I IMPORTANT, CONTENTS AND DEFINITIONS

The board of directors, the supervisory committee and the directors, supervisors and senior management of the Company hereby warrant that there are no false representations, misleading statements or material omissions contained in this interim report, and jointly and severally accept full responsibility for the truthfulness, accuracy and completeness of its contents.

Liu Yun Long, the legal representative of the Company, Liu Min, the person in charge of accounting department and Zhang Xue Mei, the head of the accounting department, declare that they guarantee the truthfulness, accuracy and completeness of the financial statements in this interim report.

All Directors attended the Board meeting for considering this report.

This report involves forward-looking statements about future plans, which do not constitute actual commitments to investors by the Company. Investors and the parties concerned should maintain sufficient knowledge of the underlying risks and understand the differences among plans, projections and commitments. Investors are advised to make themselves aware of the risks associated with investment.

The Company has described in detail the potential risks in the section headed “Discussion and Analysis of Operations” in Section IV of this report. Investors are advised to read carefully the contents thereof.

The Company does not propose any payment of cash dividends or any issue of bonus shares or any transfer of reserve to capital.

## SECTION II COMPANY PROFILE AND KEY FINANCIAL INDICATORS

### I. Company profile

Stock short name	Shandong Molong	Stock code	002490
Stock exchange of listed securities	SZSE		
Stock short name	Shandong Molong	Stock code	00568
Stock exchange of listed securities	SEHK		
Chinese name of the Company	山東墨龍石油機械股份有限公司		
Chinese short name of the Company (if any)	山東墨龍		
English name of the Company (if any)	Shandong Molong Petroleum Machinery Company Limited		
English short name of the Company (if any)	Shandong Molong		
Legal representative of the Company	Liu Yun Long		

### II. Contact persons and contact information

#### Secretary to the board of directors

Name	Zhao Xiao Tong
Contact Address	No. 999 Wen Sheng Street, Shouguang City, Shandong Province
Telephone	0536-5100890
Facsimile	0536-5100888
Email Address	dsh@molonggroup.com

3

### III. Others

#### 1. Contact method of the Company

Any changes in the registered address, office address and zip code, website, e-mail address of the Company during the reporting period

Applicable  Not applicable

There were no changes in the registered address, office address and zip code, website and e-mail address of the Company during the reporting period. For details, please see the Annual Report 2019.

#### 2. Information disclosure and places of keeping records

Any changes in information disclosure and place of keeping records during the reporting period

Applicable  Not applicable

There were no changes in the designated newspapers for information disclosure, the website designated by CSRC for the publication of interim reports and the place of keeping interim reports of the Company during the reporting period. For details, please see the Annual Report 2019.

#### IV. Key accounting data and financial indicators

Whether the Company is necessary to make retrospective adjustments or restatements for the accounting data in previous years.

Yes  No

	<b>The reporting period</b>	Same period last year	<b>Year-on-year increase/decrease</b>
Operating revenue (RMB)	<b>1,346,377,691.82</b>	2,377,445,034.26	-43.37%
Net profit attributable to shareholders of the listed company (RMB)	<b>(109,325,493.01)</b>	18,012,923.36	-706.93%
Net profit after extraordinary gains or losses attributable to shareholders of the listed company (RMB)	<b>(107,680,448.54)</b>	14,993,661.58	-818.17%
Net cash flows generated from operating activities (RMB)	<b>62,467,301.30</b>	273,711,631.80	-77.18%
Basic earnings per Share (RMB/share)	<b>(0.137)</b>	0.0226	-706.19%
Diluted earnings per Share (RMB/share)	<b>(0.137)</b>	0.0226	-706.19%
Weighted average rate of return on net assets (%)	<b>-6.46%</b>	0.92%	-7.38%
	<b>As at the end of the reporting period</b>	As at the end of last year	<b>Year-on-year increase/decrease</b>
Total assets (RMB)	<b>5,448,778,468.88</b>	5,735,752,344.59	-5.00%
Net assets attributable to shareholders of the listed company (RMB)	<b>1,637,955,773.86</b>	1,747,518,970.85	-6.27%

4

#### V. Differences in accounting data under domestic and overseas accounting standards

1. *Differences in net profit and net assets in the financial statements as disclosed under the International Accounting Standards (“IASs”) and under PRC Generally Accepted Accounting Principles (“PRC GAAP”)*

Applicable  Not applicable

During the reporting period, there were no differences in net profit and net assets in the financial statements as disclosed under the IASs and under PRC GAAP.

2. *Differences in net profit and net assets in the financial statements as disclosed under the overseas accounting standards and PRC GAAP*

Applicable  Not applicable

During the reporting period, there were no differences in net profit and net assets in the financial statements as disclosed under the overseas accounting standards and PRC GAAP.

## VI. Extraordinary gain or loss items and amounts

Applicable  Not applicable

Unit: RMB

Item	Amount	Note
Gains or losses arising from the disposal of non-current assets (including the written-offs that have been provided for impairment of assets)	(89,482.39)	Mainly comprised of the loss on disposal of fixed assets in the current period.
Government grants included in the profit or loss for the current period (excluding those grants that are closely related to the Company's business and that were granted in accordance with the standard amount or volume prescribed by the State)	569,548.00	Mainly comprised of the stability subsidies received in the current period.
Gains or losses arising from contingencies unrelated to the normal operation of the Company	(3,216,057.10)	Mainly comprised of the provision for loss on compensations for claims related to investors' litigations in the current period.
Non-operating income and expenses other than the above items	927,683.35	Mainly comprised of the damages received pursuant to an agreement in the current period.
Other gains or losses that meet the definition of extraordinary gains or losses	32,402.96	Mainly comprised of the refunds of handling fees for withholding and payment of individual income tax received in the current period.
Less: Effect on income tax	(184,389.92)	—
Effect on minority interests (after tax)	53,529.21	—
Total	(1,645,044.47)	—

Reasons should be given if the Company has classified any extraordinary profit or loss items (as defined and listed in the Explanatory Announcement No. 1 on Information Disclosure for Companies Offering Their Securities to the Public — Extraordinary Profit and Loss) as recurring gain and loss items.

Applicable  Not applicable

The Company did not classify any extraordinary profit and loss items (as defined and listed in the Explanatory Announcement No. 1 on Information Disclosure for Companies Offering Their Securities to the Public — Extraordinary Profit and Loss) as recurring gain and loss items during the reporting period.

## SECTION III SUMMARY OF THE COMPANY BUSINESS

### I. Principal businesses of the Company during the reporting period

#### (I) Descriptions of the Company's principal businesses during the reporting period

During the reporting period, the Company was principally engaged in the research and development, production and sales of products for the energy equipment industry. The main products included pipes for petroleum and gas extraction, fluid and structural pipes, pumping units, oil pumps, sucker rods, cylinder liners for drilling rigs, valve parts, castings and forgings, and others. The Company's products were mainly used in industries in connection with petroleum, natural gas, coalbed methane, shale gas and other energy drilling, machinery processing, urban pipe network, etc. During the reporting period, pipe products contributed nearly 80% of the Company's sales, and were the main source of the revenue and profit of the Company. During the reporting period, there was no material change in the structure of Company's principal businesses.

The Company's main products were pipe products, which were divided into API standard products and non-API standard products. The Company adopted a "sales-based production" business model for production, i.e. the production system of the Company will produce, inspect and deliver the products according to the order placed by customer specifying the required specification and quantity. The Company adopted a centralised procurement model under which all raw materials, moulds and equipment were centrally purchased by the procurement department and it was also responsible for the signing of procurement contracts, procurement status follow-up, facilitating quality improvement of raw material. The procurement department strictly controlled the selection of suppliers based on the comprehensive overall evaluation index system, fostered quality partners and developed long-term and stable strategic partnership. The Company had a relatively mature sales network and has established dedicated sales companies and import & export companies, responsible for domestic and international market research, research and development, product sales and post-sales services, respectively.

#### (II) Basic information of the Company's industry during the reporting period

The Company operates in the energy equipment industry covering energy sources such as petroleum, natural gas, shale gas, coal, coalbed methane and others, which is apparently vulnerable to changes in economic development cycle, market consumption and demand, cycle of crude oil prices and cycle of raw material prices. During the reporting period, hit by the COVID-19 pandemic and the fluctuation of international oil prices, the capacity utilisation rate of domestic and overseas oilfield drilling operations decreased, the demand in downstream markets inclined to shrink and oil companies at home and abroad accordingly made adjustments to their capital expenditures. However, in the medium and long run, the strategy about energy safety is not going to waver. Against the backdrop of China's continued high external dependence on crude oil and natural gas, the goals of "stabilising oil market and increasing demand for natural gas" would not change and the oil and gas exploration and development market in China is expected to maintain long-term stability and growth.

Furthermore, with the full opening up of China's oil and gas exploration and development market, private and foreign-invested companies and different sectors have hopes of investing capital into the domestic market, to bring new blood for China's oil and gas exploration and development and drive new demand for the energy equipment industry. As the pandemic situation in the world's major countries is easing, the overall demand in the industry will gradually come out of trough and stride into a phase of recovery.

Looking forward to the second half of 2020, to address the stresses and challenges brought about by various uncertainties, management of the Company will take active steps in adjusting business strategies, increase effort in exploring new markets and developing new products, and concentrate on enhancing product quality and brand awareness. The Company will seek to promote quality and efficiency enhancement by deepening internal tapping and refining management. The Company will strengthen technological innovation and equipment upgrade and pursue closer industry-university-institute cooperation to achieve continuous improvement in production capacity and efficiency. The Company will continue to optimise its personnel placement system to recruit high-calibre talents, and build a corporate culture adaptive to the development of the Company to foster stronger cohesiveness company-wide. The Company will strive to achieve higher standards of corporate governance through optimising management processes.

## II. Significant changes in major assets

### 1. Significant changes in major assets

Major asset	Description of significant change
Equity assets	No significant change
Fixed assets	No significant change
Intangible assets	No significant change
Construction-in-progress	No significant change
Monetary funds	As at the end of the reporting period, monetary funds increased by 31.11% compared to the beginning of the year, mainly attributable to the increased security deposits in the period and the receipts of new financing during the period.
Bills receivable	As at the end of the reporting period, bills receivable decreased by 49.38% compared to the beginning of the year, mainly attributable to the decline in operating revenue for the current period, which resulted in a corresponding decrease in trade acceptance bills received.
Financing receivables	As at the end of the reporting period, financing receivables decreased by 87.58% compared to the beginning of the year, mainly attributable to the decline in operating revenue for the current period, which resulted in a corresponding decrease in bank acceptance bills received.
Loans and advances	As at the end of the reporting period, loans and advances decreased by 40.50% compared to the beginning of the year, primarily attributable to the recovery of loans by subsidiaries during the current period.
Prepayments	As at the end of the reporting period, prepayments increased by 98.96% compared to the beginning of the year, primarily attributable to the increase in prepayments for material procurements as at the end of the reporting period.
Other current assets	As at the end of the reporting period, other current assets decreased by 37.44% compared to the beginning of the year, primarily attributable to the decrease in input value-added tax as at the end of the reporting period.
Other non-current assets	As at the end of the reporting period, other non-current assets decreased by 54.26% compared to the beginning of the year, primarily attributable to the arrival of certain equipment items during the current period which were purchased by prepayments at the end of last year.

### 2. Major overseas assets

Applicable  Not applicable

### **III. Analysis of core competitiveness**

#### **1. *Strength in technological research and development***

With the emphasis on investment in technology development and advancement of proprietary innovation capability, the Company formed a professional and stable scientific research team through internal nurturing and external introduction of talents, and collaboration with tertiary colleges and scientific research institutes, to enable it to have strong strengths in research and development. The Company now has 76 patents, of which 65 are utility model patents, 11 are invention patents. 72 of them have been listed as provincial technology innovations in Shandong. The Company is a high-new technology enterprise in Shandong, with the establishments of Shandong OCTG Engineering and Technological Research Centre (山東省石油專用管工程技術研究中心) and is recognised as a Shandong provincial enterprise technology centre. The post-doctoral scientific research work station of the Company has become the “first nation-wide and industry-wide post-doctoral scientific research work station”.

#### **2. *Strength in product quality***

The Company attaches importance to management of product quality. To fully ensure the product quality, the Company is well-equipped with inspection and monitoring equipment. The Company has long been accredited ISO9001 international quality system certification, ISO14001 environmental management system certification and OHSAS18001 occupational health and safety management system certification. With the main products being approved to use the industry logo of American Petroleum Institute (abbreviated as “API”), the Company successfully gained access to the domestic and global oil field markets. The main products, namely casings, valves, mud pump liners, precision stainless steel forgings, three kinds of oil pumping units and accessories, are highly marketable globally in major oil-producing regions such as Europe, the Americas and the Middle East, and are well-received by local and overseas customers.

8

#### **3. *Strength in marketing***

The Company sets foothold in China and goes global. Over the years of development, the Company has built a network providing long-term, stable, fast and effective sales services and established a loyal, long-lasting and win-win partnership with mass customers. In the domestic market, the Company has a relatively stable customer base which includes, without limitation to, PetroChina, Sinopec, CNOOC and Yanchang Petroleum. The major overseas markets are countries and regions including the United States, Mexico, Canada, Russia, the Middle East. The Company has a marketing team consisting of talents who are professionals in international trade and marketing and have extensive experience and strong business competence, which allows the Company to enjoy, to a certain extent, competitive edge in marketing of oil equipment products.

#### **4. *Strength in brand name***

The Company is a listed company that specialises in the design, research and development, process manufacturing, sales and exports of energy equipment. The Company is also a qualified supplier of the largest four oil conglomerates in China and one of the top four suppliers of PetroChina’s Type I products. The Company has always adhered to its principle of “encouraging all people, absorbing all thinks, collecting all contributions and creating all achievements”. Through expansion of scale and extension of production chains, the Company has gained good reputation and solid position in the energy equipment market sector. The “Molong” trademark of the Company is named as a famous trademark of Shandong Province, and the products of the Company have become a key export brand for nurturing and development in Shandong Province.

## SECTION IV DISCUSSION AND ANALYSIS OF OPERATIONS

### I. Overview

During the reporting period, the global spread of COVID-19 hit the ordinary economic activities in all industries at different levels. The world economy showed a downward trajectory. The energy equipment manufacturing industry where the Company operates was hard hit by the pandemic in particular. Amid the excessively volatile international oil prices, the capacity utilisation rate of domestic and overseas oilfield drilling operations declined, the demand in downstream markets inclined to shrink and the order volumes significantly decreased. Under such circumstances, there was a relatively substantial drop in both the production and sales volumes of the Company's pipe products during the reporting period. Meanwhile, product prices maintained low owing to the weakened downstream demand. As a result, the Company suffered a decrease in operating revenue and a loss in operating results.

To address the stresses and challenges brought about by various uncertainties, management of the Company took active steps in adjusting business strategies to prioritising the partnership with stable, long-term and quality customers, initiating adjustment to product mix and further developing the castings and forgings market. During the reporting period, the Company proactively broadened the applications and sales channels of pipe products, which enabled an effective integration between, and a positive adjustment in sales of, the OCTG products and the other social pipes markets. In terms of OCTG products, the Company developed new products, namely bimetal corrosion-resistant pipes and ML125V casings, which have been put into trial operation at some oilfields. In terms of social pipes, seamless steel axle pipes, hydraulic prop tubes and seamless steel cold-drawn pipes have been put into mass production and supplied to some companies. During the reporting period, with greater effort placed in promotion, the Company achieved a further increase in the production and sales volumes of high-end castings and forgings, and a significant year-on-year growth in operating revenue.

As at the end of the reporting period, the Company had total assets of RMB5,448.7785 million, representing a decrease of 5.00% year-on-year. Net assets attributable to shareholders of the listed company were RMB1,637.9558 million, representing a decrease of 6.27% year-on-year. During the reporting period, the Company achieved an operating revenue of RMB1,346.3777 million, representing a decrease of 43.37% year-on-year. Net loss attributable to shareholders of the listed company of RMB109.3255 million was recorded, compared to a profit of RMB18.0129 million in the corresponding period of last year.

## II. Analysis of principal businesses

### Overview

See "I. Overview" under "Discussion and Analysis of Operations" for details.

### Year-on-year changes in key financial data

Unit: RMB

	The reporting period	Same period last year	Year-on-year increase/decrease	Reason(s) for the change
Operating revenue	<b>1,346,377,691.82</b>	2,377,445,034.26	-43.37%	Mainly attributable the impact of the pandemic during the current period under which international crude oil prices fluctuated significantly and the demand of domestic and overseas oilfields weakened, which led to a decline in the Company's operating revenue.
Operating costs	<b>1,244,256,538.68</b>	2,156,658,882.03	-42.31%	Mainly attributable to the decrease in operating revenue for the current period.
Selling expenses	<b>27,322,539.42</b>	39,984,800.58	-31.67%	Mainly attributable to the decrease in transportation fees resulted from the reduced shipments during the current period.
Administrative expenses	<b>86,163,288.05</b>	55,293,610.81	55.83%	Mainly attributable to the impact of the pandemic during the current period under which depreciation, labor costs and other expenses during the shutdown period were transferred to this line item for accounting.
Finance costs	<b>73,135,285.58</b>	79,893,627.95	-8.46%	—
Income tax expenses	<b>1,300,015.86</b>	3,410,375.68	-61.88%	Mainly attributable to the decrease in deferred income tax expenses recognised for the current period.
Research and development expenditures	<b>22,669,450.38</b>	38,695,846.55	-41.42%	Mainly attributable to the reduction in research and development expenditures during the current period.
Net cash flow generated from operating activities	<b>62,467,301.30</b>	273,711,631.80	-77.18%	Mainly attributable to the decrease in operating revenue for the current period.
Net cash flow generated from investing activities	<b>(12,605,213.76)</b>	10,521,608.60	-219.80%	Mainly attributable to the due redemption of the bank financial products purchased by subsidiaries in the same period of last year.

Unit: RMB

	<b>The reporting period</b>	Same period last year	<b>Year-on-year increase/decrease</b>	<b>Reason(s) for the change</b>
Net cash flow generated from financing activities	<b>(74,444,055.54)</b>	(343,263,655.30)	78.31%	Mainly attributable to the decrease in cash repayments for due debts during the current period.
Net increase in cash and cash equivalents	<b>(26,016,644.43)</b>	(62,237,349.04)	58.20%	—

### *Significant changes in profit composition or sources of the Group for the reporting period*

Applicable  Not applicable

There were no significant changes in the profit composition or sources of Group during the reporting period.

### *Reason(s) for the change of caliber*

Regarding the product classification, the production and sales volumes of the Company's pipe products dropped sharply in 2020 due to the pandemic. In light of this, management of the Company took active steps in adjusting business strategies, initiating adjustment to product mix, further developing the castings and forgings market, and increasing effort in the promotion of high-end castings and forgings. The production and sales volumes of high-end castings and forgings were therefore further increased. During the reporting period, high-end castings and forgings accounted for 9.10% of operating revenue and 18.55% of operating profit. These percentages reached the requirements for separate presentation and disclosure. During the reporting period, there were no changes in the calibers of industry and region classifications.

Reason(s) for year-on-year changes of over 30% in the underlying data:

Applicable    Not applicable

1. For pipe products and tube blanks, compared to the same period of last year, revenue decreased by 38.04% and 82.46% and costs decreased by 34.79% and 81.94%, respectively. Such decreases were primarily attributable to the impact of the pandemic during the current period under which international crude oil prices fluctuated significantly and the demand of domestic and overseas oilfields weakened, which led to a decline in the Company's operating revenue. Operating revenue from within China decreased by 47.29%.
2. Revenue from petroleum machinery parts decreased by 71.83% compared to the same period of last year, primarily attributable to the lower export volume due to impact of the pandemic overseas.
3. Compared to the same period of last year, revenue from high-end castings and forgings increased by 567.12% and their costs increased by 551.29%. Such increases were mainly attributable to the fact that management of the Company took active steps in adjusting business strategies, initiating adjustment to product mix, further developing the castings and forgings market, and increasing effort in the promotion of high-end castings and forgings. The production and sales volumes of high-end castings and forgings were therefore further increased.
4. Revenue from other products decreased by 37.56% compared to the same period of last year, primarily attributable to decrease in operating revenue as less augmented products of the Company were sold during the current period.

## **IX. Forecast of the operating results from January to September 2020**

18

Alert of forecast regarding potential loss in total net profit from the beginning of the year to the end of the next reporting period or significant year-on-year changes and its reason(s)

Applicable  Not applicable

## **X. Risk exposures and contingency measures of the Company**

### *(1) Market risk*

The Company operates in the energy equipment and service industry. The development and sentiment of the energy industry are directly relevant to the growth of the industry where the Company operates in. Crude oil prices are highly cyclical and volatile as they are subject to fluctuation due to global economic growth rate, regional, political, financial, supply and demand, and a number of other factors. At times of low oil prices, oil and gas companies accordingly cut capital expenditures, invest less in exploration and development, and thus the demand for equipment and services in the oil and gas industry becomes weaker. In response, the Company will adjust its product structure and market plan in a timely manner according to market changes.

### *(2) Raw material price fluctuation risk*

Fluctuations in raw material prices affect directly the manufacturing costs of products which have a direct impact on product prices. The Company closely monitors the movements of raw material prices and controls the manufacturing costs of product by certain ways such as locking the raw material prices, and will timely adjust the product prices and product mix according to situations.

### (3) Policy risk

In recent years, the PRC has continuously raised environmental protection requirements, and environmental protection policies have become more frequently issued and stricter. Environmental protection supervision has been continuously implemented. The improvement of emission standards is bound to increase the Company's environmental protection related costs. The Company has always been aiming at "energy saving, emission reduction and harmonious development", vigorously pursuing circular economy, maximising resource utilization, and increasing environmental protection investment to ensure the waste discharges of the Company is up to standards.

### (4) Exchange rate risk

Any changes in the RMB exchange rate have impact on the Company's operating results. The Company will closely monitor the changes in exchange rates and will take timely measures to avoid any risks caused by changes in the RMB exchange rate.

### (5) Uncertainties regarding the impact of COVID-19

In the first half of 2020, the COVID-19 spread globally. Although the pandemic is now getting controlled, there remains a risk of rebound, which brings a lot of uncertainties to the business operation of the Company in the future. The Company will persistently implement adequate pandemic prevention and control, and exercise stringent pandemic prevention measures. The Company will also initiate good communication with customers and suppliers, in order to provide better logistic supply chain services for both supply and demand sides, thereby striving to achieve steady development of the Company.

## XI. Disclosures in accordance with the Listing Rules of the SEHK

19

### 1. Results

### 7. *Directors' and supervisors' service contracts or letters of appointment*

Each of the directors and supervisors (including the independent non-executive directors and the supervisors) has entered into a service contract or letter of appointment with the Company. None of the directors or supervisors has entered into any service contracts with the Company which is not determinable by the Company within one year without payment of compensation (other than statutory compensation).

### 8. *Continuing connected transactions*

During the reporting period, the Company entered into a connected transaction with Karamay Yalong Petroleum Machinery Co., Ltd. (克拉玛依亞龍石油機械有限公司), an invested company in which the Company holds 30% interest. The transaction amount was RMB650,400. For details, please refer to the sub-section headed "XII. Connected persons and connected transaction" in the financial report under Section XI of this interim report.

## 9. *Directors', supervisors' and chief executive's interests in securities under the Securities and Futures Ordinance ("SFO") of Hong Kong*

As at 30 June 2020, the following directors, supervisors and chief executives of the Company had (a) interests and short positions in the shares, underlying shares and debentures of the Company or any of its associated corporations (within the meaning of Part XV of the SFO), which were required to be notified to the Company and the SEHK pursuant to Divisions 7 and 8 of Part XV of the SFO (including the interests or short positions which they were taken or deemed to have under such provisions of the SFO), or (b) interests and short positions which were required, pursuant to section 352 of the SFO, to be entered in the register referred to therein, or (c) interests and short positions which were required pursuant to the Model Code, to be notified to the Company and to the SEHK as below:

### Long positions in the shares of the Company

Name	Type of interest	Number of A shares	Approximate percentage of A shares	Approximate percentage of the total registered share capital
Liu Yun Long	Beneficial interest	2,500	0.00%	0.00%
Wang Quan Hong	Beneficial interest	139,500	0.03%	0.02%

Saved as disclosed above, as at 30 June 2020, to the best knowledge of any directors, supervisors or chief executive of the Company, none of the directors, supervisors or chief executive of the Company had any interests or short positions in the shares, underlying shares or debentures of the Company or any of its associated corporations (within the meaning of Part XV of the SFO), which (a) were required pursuant to section 352 of the SFO to be entered in the register referred to therein, or (b) were required pursuant to the Model Code to be notified to the Company and the SEHK.

21

## 10. *Directors' and supervisors' rights to acquire shares or debentures*

None of the directors or supervisors or their respective associates (as defined under Rule 1.01 of the Listing Rules) was granted by the Company or its subsidiaries any rights to acquire any shares in or debentures of the Company or had exercised any such rights in the first half of 2020.

## 11. *Share option scheme*

The Company does not operate any share option scheme.

## 12. *Substantial shareholders*

Details are set out in the section headed "Changes in share capital and shareholders" in Section XI of this interim report.

## 13. *Directors' and supervisors' interests in contracts*

There were no contracts of significance to the business of the Group and in which any of the directors or supervisors had a material interest, whether directly or indirectly, subsisted in the first half of 2020 or as at 30 June 2020.

## **14. Material contracts**

No contract of significance has been entered into between the Company (or any of its subsidiaries) and the controlling shareholders of the Company (or any of their subsidiaries), and no contract of significance for the provision of services to the Company (or any of its subsidiaries) by any of the controlling shareholders of the Company (or any of their subsidiaries) has been entered.

### **Audit Committee**

The Audit Committee (with members consisting of three independent non-executive directors) held two meetings during the six months ended 30 June 2020 to discuss matters such as the accounting standards and practices adopted by the Group, internal control and financial reporting, and has reviewed this report. Based on the discussions in the meetings, the Audit Committee was satisfied that the financial statements set out in this report were prepared in accordance with applicable accounting standards and fairly present the Group's financial position and the results for the six months ended 30 June 2020. The interim results for the six months ended 30 June 2020 have not been reviewed by the auditors of the Company.

### **Director's Securities Transactions**

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model Code") as set out in Appendix 10 to the Listing Rules and requires directors to follow the Model Code while conducting securities transactions. The Model Code also applies to the Company's senior management. The Company has made specific enquiries to all directors and all of them have confirmed that they have fully complied with the Model Code during the six months ended 30 June 2020.

## **15. Purchase, sale or redemption of securities**

None of the Company or any of its subsidiaries has purchased, sold or redeemed any listed securities of the Company during the first half of 2020.

## **16. Pre-emptive rights**

There is no provision for pre-emptive rights under the articles of association of the Company or the laws of the PRC which would oblige the Company to offer new shares on a pro rata basis to existing shareholders.

## **17. Corporate Governance**

The Company has strictly complied with requirements of laws, regulations and regulatory documents including the Company Law, the Securities Law, the Code of Corporate Governance of Listed Companies and the Guidelines for Articles of Association of Listed Companies since its establishment and continued to raise its corporate governance standards. During the reporting period, the Company continued to enhance its governance system and operation procedures in accordance with the work plan of the regulatory authorities and the latest regulatory requirements. There were no differences between the actual conditions of the Company's corporate governance and the requirements under the CSRC's related laws and regulations. The Company has adopted all code provisions set out in the Corporate Governance Code of Appendix 14 to the Listing Rules of the SEHK of Hong Kong.

During the reporting period, the Company has complied with the code provisions set out in the Corporate Governance Code (the "Code") as contained in Appendix 14 to the Listing Rules of The Stock Exchange of Hong Kong Limited without any deviation. None of the directors of the Company was aware of any information that would reasonably indicate that the Company was not in compliance with the Code at any time during the reporting period.

## 18. Sufficiency of public float

According to information publicly available to the Company and to the best knowledge of the directors, the directors confirmed that the Company has maintained a sufficient public float throughout the current year and up to the date of this report.

## 19. Substantial shareholders' interests in securities

As at 30 June 2020, to the best knowledge of the Directors, Supervisors and chief executive, as shown in the register of interests and/or short positions required to be maintained pursuant to the provisions of Divisions 2 and 3 of Part XV of the SFO or as recorded in the register required to be kept under Section 336 of SFO, the following substantial shareholders and other persons had interests and/or short positions in the shares or underlying Shares of the Company:

### Long positions in the shares of the Company

Substantial shareholder	Nature of interest	Number of A shares	Approximate shareholding percentage of A shares	Approximate shareholding percentage of total registered capital
Zhang En Rong (Note 1, 3)	Beneficial interest	235,617,000	43.49%	29.53%
Zhang Yun San (Note 3)	Beneficial interest	23,108,000	4.27%	2.90%
Shandong Guohui Investment Co. Ltd. (山東國惠投資有限公司)	Security interest	150,617,000	27.80%	18.88%
China Great Wall Asset Management Co., Ltd. (Note 2)	Corporate interest	37,000,000	6.83%	4.64%
China Great Wall Asset Management Co., Ltd. Shandong Branch	Security interest	37,000,000	6.83%	4.64%

Substantial shareholder	Nature of interest	Number of H shares	Approximate shareholding percentage of H shares	Approximate shareholding percentage of total registered capital
Zhang Yun San (Note 3)	Beneficial interest	9,060,400	3.54%	1.14%

### Short positions in the shares of the Company

Substantial shareholder	Nature of interest	Number of A shares	Approximate shareholding percentage of A shares	Approximate shareholding percentage of total registered capital
Zhang En Rong (Note 1, 3)	Beneficial interest	187,617,000	34.63%	23.52%

Notes:

- The shares held by Mr. Zhang En Rong have been pledged.
- China Great Wall Asset Management Co., Ltd. holds 100% equity interest in China Great Wall Asset Management Co., Ltd. Shandong Branch. Therefore, China Great Wall Asset Management Co., Ltd. is deemed to have 37,000,000 A shares of the Company.

3. Zhang En Rong is the controlling shareholder of the Company. He is the father of Zhang Yun San. The Company is not aware of any relationship between the other shareholders of the Company or whether such shareholders are parties to any concerted action.

Save as disclosed above, as at 30 June 2020, no persons (other than being a Director, Supervisor or chief executive of the Company) had any interests or short positions in the shares, underlying shares and debentures of the Company which would fall to be disclosed to the Company and the SEHK pursuant to the provisions of Divisions 2 and 3 of Part XV of the SFO and which were required to be recorded in the register to be kept pursuant to section 336 of the SFO.

## 20. Liquidity and financial resources

As at 30 June 2020, the Group recorded a current ratio of 63.35%, quick ratio of 39.36%, receivable turnover ratio of 288.81% and inventory turnover ratio of 138.56%. The main source of the Group's capital is the cash inflow from operating activities, borrowings from financial institutions and others. The Group's capital needs do not have obvious seasonal pattern.

As at 30 June 2020, the Group had total borrowings of RMB2.670 billion (as at the end of last year, the Group had total borrowings of RMB2.470 billion). As at 30 June 2020, the Group had monetary funds of RMB708 million (monetary funds as at the end of last year: RMB540 million).

## 21. Gearing ratio

The Group's gearing ratio was approximately 69.45% (2019: approximately 68.81%) which is calculated based on the Group's total liabilities of approximately RMB378,392 ten thousand (2019: approximately RMB394,679 ten thousand) and total assets of approximately RMB544,878 ten thousand (2019: approximately RMB573,575 ten thousand).

## 22. Treasury policy

The Group has established a sound and strict internal control system for cash and fund management so as to strengthen its financial management. Most of the Group's revenues are denominated in RMB. The Group's liquidity and solvency are in good condition.

## 23. Restricted assets

As at 30 June 2020, the Group had restricted assets as follows:

Item	Book value at the end of the period	Reason(s) for the restriction
Monetary funds	<b>287,857,356.48</b>	Security deposits
Bills receivable	<b>76,457,360.55</b>	Pledge of bills
Fixed assets	<b>267,496,408.96</b>	Charge for borrowings
Intangible assets	<b>238,457,543.42</b>	Charge for borrowings
Total	<b>870,268,669.41</b>	—

## 24. *Contingent liabilities*

As at the date of these financial statements, the claim cases against the Company by investors regarding false statements about securities have been entertained by the Jinan Intermediate People's Court, and the aggregate sum involved was RMB92,142,813.18. Currently, the total amount involved in cases that have been judged or closed through mediation is RMB86,760,269.86, with actual settlement amount of RMB45,300,629.75. For those closed cases, the Company is performing its obligations according to the judgment results. For those cases that have been heard but pending for judgment and those cases that have not been heard, estimated liabilities of RMB4,575,161.82 were provided at a rate of 85% with reference to the cases already closed. The Company has made cumulative total provisions for estimated liabilities of RMB49,875,791.57 in respect of this issue so far.

## 25. *Business review*

### Key financial and results performance indicators

During the reporting period, the Company achieved an unaudited operating revenue of RMB134,637.77 ten thousand, representing a decrease of 43.37% compared to the corresponding period of last year. Unaudited net profit attributable to shareholders of the listed company was -RMB10,932.55 ten thousand, compared to a profit of RMB1,801.29 ten thousand in the corresponding period of last year. Basic earnings per share was -RMB0.137 per share, compared to RMB0.0226 per share for the same period of last year. Review of the Group's results for the half year ended 30 June 2020 is set out in the sections headed "Discussion and Analysis of Operations" and "Financial Report" of this report.

### Charge on Assets

- (1) Pursuant to a financing agreement and the relevant mortgage contract entered into between the Company and the related subsidiaries with China Great Wall Asset Management Co., Ltd. Shandong Branch (中國長城資產管理股份有限公司山東省分公司) (hereinafter referred to as "Great Wall Asset Management"), Shouguang Baolong and Molong Logistic (both subsidiaries of the Company) provided collaterals to secure the Company's financing in Great Wall Asset Management by its own land use rights with licence numbered Shou Guoyong (2007) No. 02704 and Shou Guoyong (2013) No. 00352 and the related ground buildings, and by its own sea area use rights with licence numbered Guohai Zheng No.2016B37078313748, respectively. As at 30 June 2020, the book value of the above-mentioned land use rights and sea area use rights was RMB82.2353 million, and the book value of the real property buildings was RMB19.3639 million. The financing amount of the Company under such contract is RMB50.0119 million. Meanwhile, Zhang En Rong, the controlling shareholder of the Company entered into a joint liability guarantee contract (《連帶責任擔保合同》) with Great Wall Asset Management, to provide joint guarantee liability for the financing. The above mortgage guarantee and warrant guarantee is expired on 8 October 2020.

### Construction and operation of pollution prevention and control facilities

The Company and its subsidiaries conducted their environmental works in strict compliance with the environmental laws and regulations such as the Law of the People's Republic of China on Environmental Protection, the Law of the People's Republic of China on the Prevention and Control of Atmospheric Pollution, the Law of the People's Republic of China on Prevention and Control of Pollution from Environmental Noise and the Law of the People's Republic of China on Prevention and Control of Water Pollution.

Wastewater treatment facilities: The Company has equipped all production plants with integrated sewage treatment facilities which have been in normal operation. Wastewater discharged from production process are treated and recycled without outward discharge;

Exhaust treatment facilities: The Company has equipped production lines in all production complexes with the corresponding environmental facilities, including denitration and electrostatic/electric precipitator and fabric filter and new online monitoring devices, to ensure effective treatment and discharge of exhausts generated from the production process.

### **Environmental impact assessment of construction projects and other administrative permissions for environmental protection**

The Company strictly complied with the requirements of the environmental laws and regulations to carry out environmental impact assessment of construction project. The construction projects have all passed the environmental impact assessment procedures and been accepted by the relevant competent authorities, where filing procedures have been carried out. The Company's pollutants discharge permits were all valid.

### **Emergency plans for sudden environmental incidents**

Each of the Company and its subsidiaries has engaged a qualified firm to prepare its emergency plans for sudden environmental incidents, which have been filed to environment authorities after reviewed by experts. The Company and its subsidiaries also organised trainings and drills on a regular basis to rectify the problems in the area of emergency management, so as to strengthen the control of environmental risks.

### **Environmental Self-monitoring Program**

During the reporting period, the Company and its subsidiaries worked closely with local environmental inspection departments on periodic supervisory inspections, and engaged third party inspection firms to monitor their discharge statistics on a regular basis, with an aim to meet industry standards and requirements of local environmental authorities. Monthly sample testing on the related environmental statistics, supervision on stable operation of wastewater and exhaust treatment facilities are conducted to effectively ensure sound management of internal discharge of wastewater and exhaust.

### **Other discloseable environmental information**

There was no other discloseable environmental information.

### **Other environmentally related information**

There was no other environmentally related information.

## **2. *Fulfillment of social responsibility regarding targeted poverty alleviation***

During the reporting interim period, the Company did not commence any targeted poverty alleviation activity, and there was also no subsequent targeted poverty alleviation plan.

## **XVII. Descriptions of other significant events**

Applicable  Not applicable

### **1. Completion of deregistration of subsidiaries**

On 29 October 2019, the fifth meeting of the sixth session of the board of directors of the Company considered and passed a “Resolution on the deregistration of a wholly-owned subsidiary” (《關於註銷全資子公司的議案》), which proposes to dispose Shouguang Maolong Old Metals Recycle Co., Ltd., a wholly-owned subsidiary of the Company, by way of liquidation and deregistration (Announcement number : 2019-029). On 18 February 2020, the Company received from Shouguang Administrative Examination and Approval Service Bureau a notice of deregistration approval, notifying that the procedures for deregistering Maolong Recycle have been completed (Announcement number: 2020-002). Upon the deregistration, Maolong Recycle is no longer consolidated into the Company.

### **2. Proposed deregistration of a subsidiary**

### III. General information of the Company

Shandong Molong Petroleum Machinery Company Limited (hereunder the “Company”, together with its subsidiaries, the “Group”) is a joint stock limited company registered in the People’s Republic of China. Its predecessor company is Shandong Molong Group Co.. The Company was jointly promoted and founded by Zhang En Rong, Lin Fu Long, Zhang Yun San, Xie Xin Cang, Liu Yun Long, Cui Huan You, Liang Yong Qiang, Shengli Oil Field Kaiyuan Oil Exploitation Company Limited (勝利油田凱源石油開發有限責任公司) and Gansu Industrial University Alloy Materials Factory (甘肅工業大學合金材料總廠) on 27 December 2001 with the approval from Shandong Economic Restructuring Office (山東省經濟體制改革辦公室) under with the Document Lu Ti Gai Han Zi [2001] No. 53 (魯體改函字[2001]53號文).

Upon the approval by China Securities Regulatory Commission under the Document Zheng Jian Guo He Zi [2003] No. 50 (證監國合字[2003]50號文), on 15 April 2004, the Company issued 134,998,000 additional overseas listed foreign shares (H Shares) with a nominal value of RMB0.10 each at an issue price of HKD0.70 per share, and listed on the Growth Enterprise Market of the SEHK.

Upon the approval by China Securities Regulatory Commission under the Document Zheng Jian Guo He Zi [2005] No. 13 (證監國合字[2005]13號文), on 12 May 2005, the Company issued 108,000,000 additional overseas listed foreign shares (H Shares) with a nominal value of RMB0.10 each at an issue price of HKD0.92 per share.

Upon the approval under the Document Zheng Jian Guo He Zi [2007] No. 2 (證監國合字[2007]2號文) issued by China Securities Regulatory Commission on 26 January 2007 and the approval issued by the SEHK on 6 February 2007, the Company’s overseas listed foreign shares (H Shares) were withdrawn from listing on the Growth Enterprise Market of the SEHK and transferred to list on the Main Board of the SEHK on 7 February 2007.

Upon the approval by China Securities Regulatory Commission under the Document Zheng Jian Xu Ke [2010] No. 1285 (證監許可[2010]1285號文), on 11 October 2010, the Company offered 70,000,000 RMB ordinary shares (A Shares) with a nominal value of RMB1 each at an issue price of RMB18 per share, which were listed for trading on the SZSE since 21 October 2010. The Company’s registered capital was changed to RMB398,924,200.00, and the total number of shares was changed to 398,924,200 shares.

Pursuant to a resolution of the Annual General Meeting 2011 convened on 25 May 2012, on the basis of a total of 398,924,200 shares as at 31 December 2011, the Company increased its share capital through transfer of capital reserve at the ratio of 1 new share for 1 existing share, totalling 398,924,200 new shares, on the date of transfer, being 19 July 2012. Upon such transfer, the Company’s registered capital was changed to RMB797,848,400.00, and the total number of shares was changed to 797,848,400 shares.

As at 31 December 2019, the Company had a registered capital of RMB797,848,400.00, divided into a total of 797,848,400 shares.

The Company’s place of domicile and office address are both at No. 999 Wen Sheng Street, Shouguang City, Shandong Province.

The Company and its subsidiaries (hereunder referred as to the “Group”) operate in the machinery manufacturing industry and are principally engaged in the manufacture of special equipment for petroleum machinery. The scope of business mainly covers the production and sale of oil pumps, sucker rods, pumping units, tubing, petroleum machinery and textile machinery; development of petroleum machinery and related products; commodity information services (excluding intermediaries) (The project approved by law can only be carried out with the approval of the relevant department, and the validity period shall be subject to the licence).

The controlling shareholder and ultimate controller of the Company is Zhang En Rong, a natural person.

The Group’s consolidated financial statements covers nine companies including Shouguang Baolong Petroleum Equipment Co., Ltd. (壽光寶隆石油器材有限公司), Shouguang Maolong New Materials Technology Development Co., Ltd. (壽光懋隆新材料技術開發有限公司) and Weihai Baolong Special Petroleum Materials Co., Ltd. (威海市寶隆石油專材有限公司). During the reporting period, the consolidated statements did not cover 2 subsidiaries, namely Maolong Recycle and Wendeng Baolong. The scope of consolidated financial statements and its changes are described in “VIII. Change in the scope of consolidation” of this note and “IX. Interests in other entities” of this note.

## **IV. Basis of preparation of the financial statements**

### **1. *Basis of preparation***

The financial statements of the Group have been prepared using the going-concern basis and the transactions and events actually occurred and in accordance with the Accounting Standards for Business Enterprises issued by the Ministry of Finance of the PRC and the relevant requirements (collectively, "ASBEs"), and the disclosure requirements under China Securities Regulatory Commission's Compilation Rules for Information Disclosure by Companies Offering Securities to the Public No. 15 — General Provisions on Financial Reports (2014 Revision), the Companies Ordinance of Hong Kong and the Listing Rules of the SEHK, on the basis of the accounting policies and accounting estimates as stated in "IV. Significant accounting policies and accounting estimates" of this note.

### **2. *Going concern***

As at the date of the financial report, the Group has been worked smoothly with the associated financial institutions, with some financing channels developed and some facility lines increased. At present, the Company has strong order book, steady cash flows from operating activities, and a relatively promising market outlook for its self-developed new products. Besides, the Group does not have any plan for material investments in 2020.

## **V. Significant accounting policies and accounting estimates**

Specific accounting policies and accounting estimates:

The Group has adopted the accounting policies and accounting estimates specific to the characteristics of its actual production and operation, including the business cycle, recognition and measurement of financial assets, measurement of inventory dispatched, classification and depreciation of fixed assets, amortisation of intangible assets, criteria for capitalisation of research and development expenditures, recognition and measurement of revenue and others.

### **1. *Statement of compliance with the ASBEs***

The Company have prepared the financial statements in accordance with the ASBEs, which gives a true and complete view of the financial position, trading results, cashflows and other information of the Company and of the Group.

### **2. *Accounting period***

The accounting period of the Group is from 1 January to 31 December of each calendar year.

### **3. *Business cycle***

The Group's business cycle is 12 months. The period from 1 January to 31 December every year is regarded as a business cycle, which is used for determining the classification of the liquidity of assets and liabilities.

### **4. *Reporting currency***

The reporting currency of the Group is RMB.

## **5. *Accounting for business combinations under common and uncommon control***

The assets and liabilities that the Group acquires as the combining party in a business combination under common control shall be measured at their book value of the combined party on the combining date in the consolidated statements of the ultimate controlling party. The balance between the book value of the net assets acquired and that of the consideration paid shall be used to adjust capital reserves. If capital reserves are insufficient for offsetting, retained earnings will be adjusted.

The identifiable assets, liabilities and contingent liabilities acquired from the acquiree in a business combination not under common control shall be measured at fair value on the acquisition date. The combination costs shall be the aggregate of the fair value of cash or non-cash assets paid by the Group on the acquisition date to obtain control over the acquiree, the debts issued or undertaken by the Group and the equity securities issued as well as all relevant direct costs for the business combination (for a business combination realised by multiple transactions, the combination costs shall be the aggregate of the costs of all separate transactions). The amount of the combination costs in excess of the fair value of the identifiable net assets of the acquiree shall be recognised as goodwill. If the combination costs are less than the fair value of the identifiable net assets of the acquiree, the fair value of the identifiable assets, liabilities and contingent liabilities acquired from the combination as well as the fair value of the non-cash assets or the equity securities issued for paying the consideration will be reviewed. If the combination costs are still less than the fair value of the identifiable net assets after review, the balance shall be accounted for as non-operating income for the current period.

## **6. *Preparation of consolidated financial statements***

The Group incorporates all controlled subsidiaries and structured entities into the scope of the consolidated financial statements.

In preparation of the consolidated financial statements, necessary adjustments will be made to that subsidiary's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies if there is inconsistency on the accounting policies and accounting period between the Company and its subsidiaries.

Significant intra-group transactions, current balance and unrealised profits within the scope of consolidation shall be offset in preparing the consolidated financial statements. The shares of owners' equity in subsidiaries not attributable to the parent company and the net loss or profit for the current period, other comprehensive income and total comprehensive income attributable to minority interests shall be presented in the consolidated financial statements as "minority interests, profit or loss attributable to minority interests, other comprehensive income attributable to minority interests and total comprehensive income attributable to minority interests", respectively.

The operating results and cash flows of a subsidiary acquired from business combination under common control shall be included in the consolidated financial statements from the beginning of the current period of the combination. When preparing the comparative consolidated financial statements, relevant items in the financial statements of the previous year will be adjusted as if the reporting entity formed after the combination had been in existence since the ultimate controlling party gains control.

In preparing consolidated financial statements, equity interests acquired by two or more transactions, which finally achieves the business combination, shall be adjusted as if they had been in existence in the current state since the ultimate controlling party gains control. When preparing the comparative statements, to the extent that the Group and the combined party are both under the control of the ultimate controlling party, the relative assets and liabilities of the combined party shall be included in the comparative statements of the Group's consolidated financial statements, and the increase in net assets arising from the combination will be adjusted against the related items under owners' equities in the comparative statements. To avoid double counting the value of the net assets of the combined party, long-term equity investments before the combination, as well as the relevant recognised profit or loss, other comprehensive income and other changes in net assets from the day of acquiring the original equity interest or the day when the Group and the combined party are under the same ultimate control, whichever is later, to the combination date shall be offset against the retained earnings at the beginning of the period and the profit or loss for the current period in the comparative statements, respectively.

The operating results and cash flows of a subsidiary acquired from a business combination not under common control unit shall be included in the consolidated financial statements since the Group gains control. When preparing the consolidated financial statements, the financial statements of the subsidiary shall be adjusted based on the fair value of the identifiable assets, liabilities and contingent liabilities determined on the acquisition date.

For equity interests in an investee not under common control acquired by two or more transactions, which finally achieves the business combination, when the Group prepares the consolidated statements, equity interests in the investee before the acquisition date shall be re-measured at fair value on the acquisition date and the balance between the fair value and the book value shall be included in the investment gains for the current period. Except for other comprehensive income arising from changes as a result of remeasurement of net liabilities or net assets of the defined benefit plan of the investee, other comprehensive income under the equity method involving the equity interests in the investee held before the acquisition date and other changes in equity except net profit or loss, other comprehensive income and profit distribution shall be converted into investment gains or loss in the period in which the acquisition date falls.

63

The difference between disposal consideration of long-term equity investment in subsidiaries partially disposed by the Group without losing controls and the share of net assets calculated from the date of acquisition or combination date shall be adjusted to capital premium or share premium in the consolidated financial statements. Adjustments shall be made to retained earnings in the event that capital reserves are not sufficient.

When the Group loses the controls over the investee due to partially disposal of equity investment and other reasons, the remaining equity shall be re-measured in accordance with the fair value on the date of losing control upon preparation of the consolidated financial statements. The amount of the sum of the consideration obtained from equity disposal and the fair value of remaining equity deducting the difference between shared net asset of original subsidiaries that were started to be calculated on the acquisition date or merging date, shall be recorded as investment gain or loss in the period of losing control, and a written down to goodwill shall be made at the same time. Other comprehensive income related to former equity investment in subsidiaries shall be recognised as current investment income upon losing of controls.

For the Group's disposal on the subsidiaries' equity investment by steps until the loses of controls, if transactions in disposal of subsidiaries' equity investment until losing control are in a package deal, each transaction shall be treated as one transaction of disposal on subsidiaries and loses of control; but the difference between considerations from each disposal of investment and shared net asset of the subsidiary before losing controls shall be recognised as other comprehensive income in the consolidated financial statements, and transferred to investment income for the period of losing controls.

## **7. *Classifications of joint arrangement and accounting treatment of common cooperation***

The joint arrangement of the Group includes common operations and joint ventures. For common operation projects, as a joint operation party the Group recognises assets and liabilities solely held by the Group and assets and liabilities held on proportion. Revenue and expenses solely or proportionally recognised in accordance with relevant agreements. Transactions on asset purchase or sales with joint ventures, that do not form normal business activity shall only recognise parts of profits and losses generated in above transactions belonging to other joint operation parties.

## **8. *Criteria for determination of cash and cash equivalents***

Cash in cash flow statement of the Group shall be cash on hand and deposits available for payment at any time. Cash equivalents in cash flow shall be investments which shall be short-term (normally become due within 3 months after purchasing date), highly liquid, readily convertible to known amounts of cash, and subject to an insignificant risk of changes in value.

## **9. *Foreign currency operations and translation of foreign currency statements***

### **(1) Foreign currency transactions**

For foreign currency transactions, the Group translate the foreign currency amounts into RMB amounts at the spot rates of exchanges on a trade-date basis. On balance sheet date, foreign currency monetary items are translated into RMB at the prevailing exchange rate of that date. Exchange differences arising thereon are directly expensed in the profit and loss for the current period unless they arise from foreign currency borrowings for the purchase or construction of qualifying assets which are eligible for capitalisation.

### **(2) Translation of foreign currency financial statements**

Assets and liabilities in foreign currency balance sheet are translated at the spot rate prevailing at the balance sheet date. Except for "undistributed profits", items under the owners' equity are translated at the spot exchange rate when they occur. Income and expenses in income statement are translated at the spot exchange rate on a trade-date basis. The resulting differences are presented under other comprehensive income. Cash flow dominated in foreign currency are translated at the spot rate when occurs. Effects on cash arising from the change of exchange rate are presented as separate item in the cash flow statement.

## **10. *Financial instruments***

Financial asset or financial liability is recognised when the Group becomes a contractual party of a financial instrument.

### **(1) Financial assets**

#### **1) *Classification, recognition and measurement of financial assets***

The Group classifies its financial assets into the following category based on the business model within which the financial asset is managed and the characteristics of contractual cashflow of the financial asset: financial assets at amortised cost, financial assets at fair value through other comprehensive income, and financial assets at fair value through profit or loss for the period.

A financial asset is classified as financial assets at amortised cost if it meets both of the following conditions: ① It is managed within a business model whose objective is to collect contractual cash flows. ② The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financial assets are initially measured at fair value, with the related transaction costs included in the amount initially recognised. The financial assets are subsequently measured at amortised cost. Except for those designated as hedged items, any difference between the initially recognised amount and the amount at maturity is amortised using effective interest method while the profit or loss on amortisation, depreciation and currency exchange and the profit or loss incurred at the time of de-recognition shall be recorded in the profit or loss of the current period.

Financial assets are classified as financial assets at fair value through other comprehensive income if both of the following conditions are met: ① the assets are managed within a business model whose objective is achieved by collecting contractual cash flows and selling financial assets; and ② the contractual terms of the financial assets specify that cash flows arising on specified dates are solely payments of principal and interest on the outstanding principal. Financial assets of this kind are initially measured at fair value and relevant transaction costs are recorded in the initially recognised amount. Except for those designated as hedged items, other profit or loss on financial assets of this kind (excluding the credit impairment loss or gain, the profit or loss on currency exchange, interests on financial assets measured by effective interest method) shall be recorded in other comprehensive income. At the time of derecognition of financial assets, the cumulative profit or loss previously recorded in other comprehensive income shall be released from other comprehensive income and recorded in the profit or loss of the current period.

The Group recognises interest income using the effective interest method. The interest income is calculated by applying the effective interest rate to the carrying amount of a financial asset, with the following exceptions: ① For a purchased or originated credit-impaired financial asset, whose interest income is calculated since initial recognition by applying the credit-adjusted effective interest rate to its amortized cost. ② For a financial asset that is not a purchased or originated credit-impaired financial asset but has subsequently become credit-impaired, whose interest income is then calculated by applying the effective interest rate to its amortized cost.

The Group designates non-trading equity instrument investments as financial assets measured at fair value through other comprehensive income. Once the designation is made, it cannot be revoked. The non-trading equity instrument investment designated by the Group at fair value through other comprehensive income is recognised initially at fair value, and related transaction expense is included in the initially recognised amount. Except for dividends (excluding any portion as return of investment cost) received and recorded in the current profit and loss, other related gains and losses (including exchange gains and losses) are included in other comprehensive income and subsequently may not be transferred to the current profits and losses. When it is derecognised, the accumulated gain or loss previously included in other comprehensive income is transferred from other comprehensive income and is included in retained earnings.

Except those classified as financial assets at amortised cost and financial assets at fair value through other comprehensive income, the Group classifies the remaining financial assets as financial assets at fair value through profit or loss. Financial assets of this kind are initially measured at fair value and relevant transaction costs are included directly in the initially recognised amount. The profit or loss on financial assets of this kind is included in the profit or loss of the current period.

When the Group changes the business model for managing financial assets, all financial assets being affected are reclassified. There were no such circumstance in the year.

2) *Basis of recognition and method of measurement of transfer of financial assets*

A financial asset is derecognised if any one of the following conditions is satisfied: ① the contractual rights to receive cash flows from the financial asset have ceased; ② the financial asset has been transferred and the Group has transferred substantially all the risks and rewards incidental to the ownership of the financial asset; ③ the financial asset has been transferred and the Group has neither transferred nor retained substantially all the risks and rewards incidental to the ownership of the financial asset, and has not retained its control over the financial asset.

Where the transfer of a financial asset in whole satisfies the criteria of derecognition, the difference between the carrying amount of the financial asset transferred and the sum of consideration received for the transfer and any cumulative gain or loss of fair value that has been recognised directly in other comprehensive income for the part derecognised (the contractual terms of the transferred financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding) is included in profit or loss for the current period.

Where the transfer of financial asset in part satisfies the criteria of derecognition, the carrying amount of the entire financial asset transferred is allocated between the part to be derecognised and the part not to be derecognised in proportion to their respective relative fair values, and the difference between the sum of the consideration received for the transfer and any cumulative gain or loss of fair value for the part derecognised that has been recognised directly in other comprehensive income for the part derecognised (the contractual terms of the transferred financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding) and the carrying amount of the entire financial asset abovementioned for allocation is included in profit or loss for the current period.

**(2) Financial liabilities**

1) *Classification, recognition and measurement of financial liabilities*

At initial recognition, financial liabilities are classified either as financial liabilities at fair value through profit or loss and other financial liabilities.

Financial liabilities at fair value through profit or loss include trading financial liabilities and financial liabilities held-for-trading and those designated as fair value through profit or loss on initial recognition. These financial liabilities are subsequently measured at fair value. The net gain or loss arising from changes in fair value; dividends and Interest expenditure related to such financial liabilities are recorded in profit or loss for the period in which they are incurred.

Other financial liabilities are subsequently measured at amortised cost, using the effective interest method. Except for the following, the Group classifies financial liabilities as financial liabilities at amortised cost: ① Financial liabilities at fair value through profit or loss, including held-for-trading financial liabilities (including derivatives that are financial liabilities) and financial liabilities designated as at fair value through profit or loss. ② Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies. ③ Financial guarantee contracts that do not fall into ① or ② above, and commitments to provide a loan at a below-market interest rate that do not fall into ① above.

For financial liabilities arising from contingent consideration recognised by the Group as an acquirer in a business combination not under the common control, they shall be measured at fair value with changes recognised in profit or loss for the current period.

2) *Criteria for derecognition of financial liabilities*

When the present obligations of financial liabilities are released in whole or in part, such financial liabilities are derecognised to the extent of the obligations released. Where the Group enters into an agreement with its creditor to replace existing financial liabilities by assuming new financial liabilities with contractual terms substantively differ from those of the existing financial liabilities, the existing financial liabilities are derecognised while the new financial liabilities are recognised. Where the Group substantively revises, in whole or in part, the contractual terms of existing financial liabilities, such existing financial liabilities are derecognised in whole or in part, while those financial liabilities with their terms revised are recognised as new financial liabilities. The difference between the carrying amount of the derecognised part and the consideration paid is included in the profit or loss for the current period.

**(3) Method for determination of fair values of financial assets and financial liabilities**

Fair values of financial assets and financial liabilities of the Group are measured at the prices in principal market. In case there is no principal market, fair values of financial assets and financial liabilities are calculated using the price which is the most beneficial to the market, and using valuation technology which is the most appropriate at that time and with sufficient available data and other information. The inputs which are used to measure the fair value have been divided into 3 levels by the Group: Level 1-inputs consist of unadjusted quoted prices in active markets for identical assets or liabilities. Level 2-inputs are quoted prices for the asset or liability (other than those included in Level 1) that are either directly or indirectly observable. Level 3-inputs are unobservable inputs to the related assets or liabilities. The Level 1 inputs are the first priority to use by the Group, and level 3 inputs will be the last one to use. The level of fair value measurement is determined by the lowest level of inputs which are significant to the measurement of fair value as a whole.

The Group measures investments in equity instruments at fair value. However, in limited circumstances, if recent information on determining fair value is insufficient, or if there is a wide range of possible fair value measurements and cost represents the best estimate of fair value within that range, the cost may be an appropriate estimate of fair value with that range.

**(4) Offsetting of financial assets and financial liabilities**

Financial assets and financial liabilities of the Group shall be presented separately in the balance sheet and shall not be offset. However, when all of the following conditions are met, a financial asset and a financial liability shall be offset and the net amount is presented in the balance sheet: (1) the Group has a legal right that is currently enforceable to set off the recognised amount, and (2) the Group intends either to settle on a net basis, or to realise the financial asset and settle the financial liability simultaneously.

## (5) Classification and treatment of financial liabilities and equity instruments

The Group classifies financial liabilities and equity instruments on the following principles: (1) Where the Group is unable to unconditionally avoid delivering cash or another financial asset to fulfil a contractual obligation, the contractual obligation meets the definition of a financial liability. Although some financial instruments do not explicitly include the terms and conditions imposing the contractual obligation to deliver cash or another financial asset, they may indirectly give rise to the contractual obligation through other terms and conditions. (2) Where a financial instrument will or may be settled in the Group's own equity instrument, consideration shall be given to whether the Group's own equity instrument as used to settle the instrument is a substitute of cash or another financial asset or the residual interest in the assets of an entity after deducting all of its liabilities. In the former case, the instrument shall be the issuer's financial liability; in the latter case, the instrument shall be the equity instrument of the issuer. Under certain circumstances whereby a financial instrument contract stipulates that the Group will or may use its own equity instrument to settle the financial instrument, and the amount of the contractual right or obligation equal to the number instrument, consideration shall be given to whether the Group's own equity instrument as used to settle the instrument is a substitute of cash or another financial asset or the residual interest in the assets of an entity after deducting all of its liabilities. In the former case, the instrument shall be the issuer's financial liability; in the latter case, the instrument shall be the equity instrument of the issuer. Under certain circumstances whereby a financial instrument contract stipulates that the Group will or may use its own equity instrument to settle the financial instrument, and the amount of the contractual right or obligation equal to the number of its own equity instruments to be received or delivered multiplied by their fair value at the time of settlement, the contract shall be classified as a financial liability, regardless of whether the amount of the contractual right or obligation is fixed, or fluctuates in full or in partly in response to changes in a variable other than the market price of the Group's own equity instruments (for example an interest rate, a commodity price or a financial instrument price).

68

When classifying a financial instrument (or a component thereof) in consolidated financial statements, the Group shall consider all terms and conditions agreed between members of the Group and the holders of the financial instrument. If the Group as a whole has an obligation in respect of the instrument to settle it by delivering cash or another financial asset or in such a way that it would be a financial liability, such instrument shall be classified as a financial liability.

If the financial instrument or its component is attributable to the financial liability, the relevant interests, dividends, gains or losses, and gains or losses arising from redemption or refinancing, shall be recorded in the profit or loss of the current period.

If the financial instrument or its component is attributable to equity instrument, the Group treats it as change in equity when it is issued (including refinanced), repurchased, sold or cancelled, and does not recognise changes in fair value of equity instrument.

## 11. *Bills receivable*

The business model of the Group's bills receivable is trade acceptance bills that collect contractual cash flows. Impairment provision of bills receivable as at the end of the period shall be made on the basis of expected credit loss of accounts receivable.

## 12. Accounts receivable

For the accounts receivable arising from the transactions regulated by the “Accounting Standards for Business Enterprises No. 14 — Revenue” and including no significant financing components, the Group always measures its loss allowance at an amount equal to the lifetime expected credit losses.

Judgment of whether credit risk has increased significantly since initial recognition. By comparing the default probability of the financial instrument within the estimated duration determined at initial recognition against the default probability of such instrument within the estimated duration determined on the balance sheet date, the Group determines whether the credit risk of financial instrument has increased significantly. However, if the Group determines that a financial instrument has only a low credit risk on the balance sheet date, it can be assumed that the credit risk of the financial instrument has not increased significantly since initial recognition. In normal circumstance, if the financial instrument is more than 30 days past due, it indicates that the credit risk of financial instrument has increased significantly; unless the Group can obtain reasonable and supportable information without undue cost or effort, which demonstrates that even if it is more than 30 days past due, the credit risk has not increased significantly since the initial confirmation. When determining whether the credit risk has increased significantly since the initial confirmation, the Group shall consider the reasonable and supportable information, including forward-looking information, that is available without undue cost or effort.

Information considered by the Group includes:

- the issuer or debtor has significant financial difficulty;
- the debtor has a breach of the contract, such as default or delay in payment of interest or principal;
- after consideration for relevant economic or contractual conditions based on the debtor's financial difficulty, the creditor grants the debtor a concession which would not be granted for any other situation;
- the debtor will probably enter bankruptcy or financial restructuring;
- the issuer's or debtor's financial difficulty conduces to the disappearance of the active market of the financial asset;
- a financial asset is purchased or originated at a large discount and the discount reflects the occurrence of credit loss.

For bills receivable and accounts receivable, the Group adopts expected credit loss approach to provide for allowances for bad debts. For bills receivable and accounts receivable which have significant different credit risk, expected credit loss is determined on an individual basis. Apart from determining expected credit loss on accounts receivable and bills receivable on an individual basis, the Group also determines the expected credit losses on a collective basis based on the age distribution and whether it is the common risk characteristics of related party amounts within the scope of consolidation. For the combination of expected credit losses based on aging characteristics and the combination of expected credit loss of related parties within the scope of consolidation, the Group calculates the expected credit loss on accounts receivable and bills receivable using the exposure to default risk and expected credit loss rate of on accounts receivable and bills receivable, and determine the expected credit loss rate based on default probability and default loss rate.

The Group measures the expected credit loss on bills receivable and accounts receivable as of the balance sheet date. When the expected credit loss is greater than the carrying amount of loss allowance for the bills receivable and accounts receivable at that time, the Group recognises the difference as loss allowance for the bills receivable and accounts receivable which shall be charged to “credit impairment loss” or credited to “provision for bad debts”. In the case contrary to the aforesaid, the Group recognises the difference as impairment gain and makes the account contrarily.

When any credit loss of the Group is actually incurred and it is certain that relevant notes receivable and accounts receivable cannot be recovered, after an approval for write-off is obtained, the approved amount of write-off shall be charged to “provision for bad debts” and credited to “notes receivable” or “accounts receivable”. If the amount written off is greater than the loss allowance, the difference is charged to “credit impairment loss” for the relevant period.

Based on the actual credit loss in previous years and taking into account of forward-looking information of the year, the Group’s accounting estimation policies for measuring expected credit losses by age group, are as follows:

Item	Within 1 year	1–2 years	2–3 years	3–5 years	Over 5 years
Default loss rate	1.00%	50.00%	75.00%	85.00%	100.00%

### 13. *Financing receivables*

For those bills receivable and accounts receivable which the contractual cash flow characteristics are consistent with the basic lending arrangements and the Company’s business model for managing such financial assets is to collect the contractual cash flows and for sale, the Company classifies such bills receivable and accounts receivable as financing receivables and measures them at fair value through other comprehensive income. At initial recognition, the fair value is always the transaction price and any change in fair value is accounted through other comprehensive income. Upon derecognition, the cumulative gain or loss previously included in other comprehensive income is transferred from other comprehensive income and credited to the profit or loss for the period.

### 14. *Other receivables*

#### **Recognition and accounting methods for expected credit loss on other receivables**

The Group provides for the loss of other receivables according to the following circumstances: ① for financial assets that the credit risk has not increased significantly since initial recognition, the Group measures the loss allowance at an amount of future 12-month expected credit losses; ② for financial assets that the credit risk has increased significantly since initial recognition, the Group measures the loss allowance at an amount equal to the lifetime expected credit losses of the financial instrument; ③ for purchased or originated credit-impaired financial assets, the Group measures the loss allowance at an amount equal to the lifetime expected credit losses.

Assessment made on a combined basis: For other receivables, the Group is unable to obtain sufficient evidence for any significant increase in credit risk at reasonable cost for one instrument, but finds it feasible to assess whether there is any significant increase in credit risk on a combined basis, therefore, by taking the type of financial instruments, credit risk rating, collateral type, date of initial recognition, remaining periods of time to maturity under remaining contracts, industry the borrower operates in and loan pledge rate as the common characteristics of risk, the Group categorizes other receivables into different groups and considers and assesses whether there is any significant increase in credit risk on a combined basis. The Group categorises other receivables into groups by nature and assesses whether there is any significant increase in credit risk.

Measurement of expected credit loss: Expected credit loss is a weighted average of credit losses on financial instruments weighted at the risk of default. Credit loss is the difference between all receivable contractual cash flows according to the contract and all cash flows expected to be received, discounted to present value at the original effective interest rate, i.e. the present value of all cash shortfalls.

The Group measures the expected credit loss on other receivables as of the balance sheet date. When the expected credit loss is greater than the carrying amount of loss allowance for other receivables at that time, the Group recognises the difference as loss allowance for other receivables which shall be charged to “credit impairment loss” or credited to “provision for bad debts”. In the case contrary to the aforesaid, the Group recognises the difference as impairment gain and makes the account contrarily.

When any credit loss of the Group is actually incurred and it is certain that relevant other receivables cannot be recovered, after an approval for write-off is obtained, the approved amount of write-off shall be charged to “provision for bad debts” and credited to “other receivables”. If the amount written off is greater than the loss allowance, the difference is charged to “credit impairment loss” for the relevant period.

## 15. Inventories

Inventories of the Group mainly include raw materials, entrusted processed materials, work-in-progress and finished products.

The inventory taking system shall be on a perpetual basis. Inventories are initially measured at cost; when inventories are delivered, weight average method is adopted to determine the actual cost of inventories delivered. Low-value consumable and packaging materials are amortised by one-time written-off.

Net realisable value of goods-in-stock, work-in-progress or held-for-sale raw materials are determined by their estimated sales less the related selling expenses and taxes. Net realisable value of held-for-production raw materials are determined by their estimated sales price of finished products less the production cost, related selling expenses and taxes.

71

## 16. Contract assets

### (1) Recognition and criteria for contract assets

A contract asset is the Group’s right to consideration in exchange for goods that it has transferred to a customer, and the right is conditioned on factors other than the passage of time. If the Group sells two clearly distinguishable goods to the customer, and it has the right to receive payment because one of the goods has been delivered, but the receipt of such payment is conditioned on the delivery of another goods, the Group shall recognise such right to receive payment as contract asset.

### (2) Recognition and accounting treatment for expected credit losses on contract assets

For the recognition and accounting treatment for expected credit losses on contract assets, please refer to the recognition and accounting treatment for bills and accounts receivable in note 12 above.

The Group measures the expected credit loss on contract assets as of the balance sheet date. When the expected credit loss is greater than the carrying amount of loss allowance for the contract assets at that time, the Group recognises the difference as impairment loss which shall be charged to “credit impairment loss” or credited to “impairment allowance for contract assets”. In the case contrary to the aforesaid, the Group recognises the difference as impairment gain and makes the account contrarily.

When any credit loss of the Group is actually incurred and it is certain that relevant contract assets cannot be recovered, after an approval for write-off is obtained, the approved amount of write-off shall be charged to "impairment allowance for contract assets" and credited to "contract assets". If the amount written off is greater than the loss allowance, the difference is charged to "credit impairment loss" for the relevant period.

## 17. Contract costs

### (1) Method for determining the amount of assets related to contract costs

The Group's assets relating to contract costs include costs to fulfil a contract and costs of obtaining a contract.

Contract performance costs represent the costs incurred by the Group in performing its contract. When the costs are not within the scope of other accounting standards for business enterprises, the Group recognises those costs as an asset if they meet all of the following criteria: the costs relate directly to a contract or to an anticipated contract that the entity can specifically identify, including direct labor cost, directly material cost, manufacturing overheads, costs that are explicitly chargeable to the customer under the contract and other costs that are incurred only because the Group has entered into the contract; the costs generate or enhance resources of the Group that will be used in satisfying performance obligations in the future; and the costs are expected to be recovered.

The cost of obtaining a contract is the incremental cost that the Group incurs to obtain a contract. If the cost is expected to be recovered, it is treated as the cost of obtaining a contract and recognised as an asset; if the amortisation period of such asset is less than one year, it is recorded in profit or loss for the current period when incurred. Incremental costs are the costs that they would not have incurred if the Group had not obtained the contract (for example, sales commission). For other expenses incurred by the Group for obtaining a contract in addition to the incremental costs expected to be recovered (such as travel expenses incurred regardless of whether the contract is obtained or not), they are recorded in profit or loss for the current period when incurred. However, those expressly bore by the customer are excluded.

### (2) Amortisation of assets related to contract costs

The Group amortises the asset relating to contract costs on a basis that is consistent with the revenue recognition relating to the asset and recognises it in profit or loss.

### (3) Impairment of assets related to contract costs

When determining the impairment loss of an asset related to the contract cost, the Group first determines the impairment loss for other assets related to the contract, which is determined in accordance with other relevant accounting standards for business enterprises; then, the Group provides for impairment allowance and recognises as an impairment loss of asset to the extent that the carrying amount of such asset exceeds the difference between the following: the remaining amount of consideration that the Group expects to receive for the transfer of goods to which the asset relates; and the costs that are estimated to be incurred for the transfer of the relevant goods.

The Group shall recognise in profit or loss a reversal of an impairment loss previously recognised when the impairment conditions change and the aforesaid difference is higher than the carrying amount of the asset. The increased carrying amount of the asset shall not exceed the amount that would have been determined if no impairment loss had been recognised previously.

## 18. Assets held for sale

- (1) The Group classifies non-current assets or disposal group that meet the following criteria as held for sale: (1) can immediately be disposed of under the current conditions based on cases of disposals of such assets or disposal groups in similar transactions; (2) the disposal is highly probable that a decision has been made on a plan for the disposal and an undertaking to purchase has been obtained, and the disposal is expected to be completed within a year. Relevant approval is required for disposals requiring approval from the relevant authorities or regulators as required by the relevant regulations. Before the Group first classifies a non-current asset or disposal group as held for sale, the book value of the non-current asset or each asset and liability in the disposal group is measured according to the requirements of the relevant accounting standards. On initial measurement or remeasurement on the balance sheet date of a non-current asset or a disposal group held for sale, where the book value is higher than the fair value less cost of disposal, the book value is written down to the fair value less disposal. The amount of write-down is recognised as an impairment loss of the asset and charged to profit and loss of the period. At the same time, provision is made for impairment of assets held for sale.
- (2) Non-current assets or disposal groups which the Group acquired specifically for disposal, satisfy the criterion of “disposal is expected to be completed within one year” on the date of acquisition, and is probable to satisfy other criteria of classifying as held for sale shortly (usually within 3 months), are classified as held for sale on the date of acquisition. At initial measurement, the amounts initially measured assuming it is not classified as held for sale and the fair value less cost of disposal are compared, and the lower of the two is measured. Other than non-current assets or disposal groups acquired in a business combination, the difference arising from recognising the fair value less cost of disposal of non-current assets or disposal groups as initial measurement is recognised in profit and loss in the period.
- (3) Where the Group has lost control of a subsidiary due to reasons such as disposal of investment in the subsidiary, regardless of the Group retains any part of equity investment after disposal, upon the investment in the subsidiary intended to be disposed satisfying the criterion for classification as held for sale, the investment in the subsidiary will be entirely classified as held for sale in the separate financial statements of the parent company, and all assets and liabilities of the subsidiary are classified as held for sale in the consolidated financial statements.
- (4) Where there is an increase in fair value less cost of disposal of a non-current asset held for sale on subsequent balance sheet dates, the amount previously written down should be recovered and reversed in the impairment loss of assets recognised after classification as held for sale, with the reversed amount recognised in profit and loss of the period. Asset impairment loss recognised before classification as held for sale is not reversible.
- (5) Asset impairment loss recognised for disposal groups held for sale is first offset against the book value of goodwill of disposal groups, and then offset against the book values proportionally according to the share of book value of each non-current asset.

Where there is an increase in fair value less cost of disposal of a disposal group held for sale in subsequent balance sheet dates, the amount previously written down should be recovered and reversed in asset impairment loss of non-current assets recognised as required by the appropriate relevant measurement after classification as held for sale, with the reversed amount recognised in profit and loss of the period. The book value of the offset goodwill and impairment loss of non-current assets recognised before classification as held for sale are not reversible.

Reversed amount after the recognition of asset impairment loss of the disposal group held for sale should be added proportionally to the book value share according to the share of the book value of each non-current asset in the disposal group other than goodwill.

- (6) No provision for depreciation or amortisation of non-current assets or non-current assets in disposal groups held for sale is made, and the interest on liabilities and other expenses of disposal groups held for sale continues to be recognised.
- (7) When a non-current asset or a disposal group held for sale no longer satisfies the criteria of classification as held for sale and ceases to be classified as held for sale, or a non-current asset is removed from the disposal group held for sale, it is measured based on the lower of the following: (1) the book value before classification as held for sale adjusted by recognition of depreciation, amortisation or impairment assuming there was no classification as held for sale; (2) the recoverable amount.
- (8) Upon derecognition of a non-current asset or a disposal group held for sale, the unrecognised gain or loss is accounted for in profit or loss of the period.

## **19. Long-term equity investments**

Long-term equity investments include the Group's investments in subsidiaries, investments in associates and jointly ventures.

Our judgement of joint control is based on the fact of arrangements that all participants involved or groups of participants jointly control and that policies of relevant activities must be unanimously agreed by participants who jointly control the arrangement.

When the Group owns 20% or above but less than 50% of the voting right of the investee directly, or indirectly through subsidiaries, it is considered to have a significant influence on the investee. If the voting right in the investee is less than 20%, the influence on investee will be decided based on facts and circumstances including representatives in the board of directors of similar authority of the investee, or participation in the process of formulating the financial and operating policies of the investee, having significant transactions with the investee, dispatching management personnel to the investee, and providing key technology and data to the investee.

An investee that is under the control of the Group is deemed as a subsidiary of the Group. For long-term equity investments acquired through a business combination under common control, they will be used as the initial investment cost of long-term equity investment according to the share of the consolidated party in the book value of net assets in the financial statements of the ultimate controlling party on the date of consolidation. If the book value of net assets of the consolidated party at the date of consolidation is negative, long-term equity investment cost is recognised as nil.

For shareholding which obtained by different transactions in stages and become business combination finally, if it belongs to package transaction, the accounting method for which each transaction applies will treat as one transaction which obtains control. If it does not belong to package transaction, according to proportion of fair value of net assets of acquiree after the combination in the consolidated financial statements, and accounted as the initial investment cost of long-term investment. Difference between initial investment cost and the carrying value of long-term equity investment before combination and the sum of carrying value of newly paid consideration for additional shares acquired on the date of combination is to adjust share premium. If the balance of share premium is insufficient, any excess is adjusted to retained earnings.

For long-term equity investments acquired through business combination under uncommon control, consolidation cost will be treated as the initial investment cost.

For shareholding which obtained by different transactions in stages and become business combination finally, if it belongs to package transaction, the accounting method for which each transaction applies will treat as one transaction which obtains control. If it does not belong to package transaction, Initial investment cost will be the sum of the carrying value of the equity investment which it originally holds, and initial investment cost will change to cost method. For shareholding which it holds before the date of acquisition which uses equity method, other related comprehensive income which use equity method for accounting shall not be adjusted, such investment shall use the same accounting basis as the invested company when it directly dispose related assets or liabilities upon disposal. For shareholding which it holds before acquisition and accounted for under fair value method in the available-for-sale financial assets, the accumulated change in fair value which is originally included in other comprehensive income shall be change to profit or loss for the current period on the date of combination.

Apart from the long-term equity investments acquired through business merger, long-term equity investments acquired by cash will be used as investment cost according to the actual payment of the purchase price; long-term equity investments acquired through issuance of equity securities will be used as investment cost according to the fair value of the equity securities issued; long-term equity investments from investors will be used as investment cost according to the investment contracts or agreement value. If the Company holds long-term equity investments acquired through debt restructuring, non-monetary asset exchange, etc., the method of recognition of investment cost should be determined according to the requirements of the relevant business accounting standards and the disclosure of the Company's actual conditions.

The Group's investments in subsidiaries are accounted for using the cost method and using equity method for the investments in joint ventures and associates.

75

For long-term equity investments for which the subsequent measure is accounted for using cost method, when making additional investment, carrying value of the long-term equity investments will be added according to the fair value of cost of additional investment and the related expenses incurred by related transactions. For cash dividend or profit paid by the invested company, it shall be recognised as investment income for the current period using the amount which it entitles.

For long-term equity investment for which the subsequent measurement is accounted for under equity method, carrying value of long-term equity investment shall be increased or decreased accordingly according to the change in the shareholders equity of the invested company. When determining the amount of proportion of net profit or loss in the invested company which it entitles, fair value of each identifiable assets of the invested company at the time when the investment is obtained shall be used as basis, and according to the accounting policies and accounting period of the Group, and after offsetting profit or loss incurred in internal transaction between associates and joint ventures, and calculate the proportion which is attributable to the investing company according to the shareholding, and recognised after adjustment is made to the net profit of the investees.

On disposal of a long-term equity investment, the difference between the carrying value and the consideration actually received is recognised as investment income for the period. For long-term investments accounted for under equity method, the movements of shareholder's equity, other than the net profit or loss, of the investee company, previously recorded in the shareholder's equity of the Company are recycled to investment income for the period on disposal.

When the Company ceases to have control or significant influence on the invested company due to the reasons such as disposal of part of its equity investment, the remaining shareholding after disposal shall be accounted for under available-for-sale financial assets, and the difference between fair value and the carry value on the date of loss of common control or significant influence will be included in the profit or loss for the current period. Other comprehensive income recognised in the original equity investment which is accounted for using equity method, upon it will no longer be accounted for under equity method it shall be using the same accounting basis as the invested company directly disposing related assets or liabilities.

For loss of control in the invested company due to partly disposed long-term equity investment, for remaining shareholding which can apply common control or impose significant influence to the invested company after disposal, shall be accounted for under equity method. Difference between the carrying value of equity disposal and the disposal consideration shall be included as investment income. Such remaining shareholding shall be treated as accounting for under equity method since the shareholding is obtained and make adjustment. For remaining shareholding which cannot apply common control or impose significant influence after disposal, it can be accounted as under available-for sale financial assets, and difference between carrying value of equity disposal and the disposal consideration shall be included as investment income, difference between fair value and the carrying value of remaining shareholding on the date loss of control shall be included in the investment profit or loss for such period.

For each transaction which equity are disposed in stages until loss of control, which does not belong to package transaction, the accounting for each transaction shall be conducted separately. For the package transaction, the accounting for each transaction shall be treated as disposing subsidiary and loss of its control. However, the difference between each disposal price before loss of control and the carrying value of the corresponding long-term investment of the equity disposed, shall be recognised as other comprehensive income, and shall be transfer to the profit or loss for the current period upon loss of control.

## 20. Fixed assets

### (1) Criteria for recognition

Fixed assets are tangible assets with significant value and useful lives for more than one year, and held for use in the production goods, renting of services, for rental, or for administrative purposes. Fixed assets are recognised when it is highly probable of economic benefits inflow to the Group and their costs can be measured reliably. The Group's fixed assets include buildings, machinery, electronic equipment, vehicles and other equipment.

### (2) Depreciation method

<b>Category</b>	<b>Depreciation method</b>	<b>Years of depreciation</b>	<b>Residual value rate (%)</b>	<b>Annual depreciation rate (%)</b>
Buildings	Straight-line	20	5	4.75
Machinery	Straight-line	5–20	5	19.00–4.75
Electronic equipment	Straight-line	3–5	5	31.67–19.00
Vehicles	Straight-line	5	5	19.00
Other equipment	Straight-line	5	5	19.00

The Group reviews the expected life of use, estimated net residual value and depreciation method of fixed assets at the end of each year, and changes, if any, are treated as changes in accounting estimates.

## 21. *Construction-in-progress*

Construction-in-progress is carried forward to fixed assets from the date when it is ready for its intended use according to its project budget, project fee or actual project cost, and depreciation is provided commencing from the next following month. Upon the completion of final account audit of the completed project, adjustment will be made for any difference from the original value of the fixed assets.

## 22. *Borrowing costs*

In terms of the borrowing costs involving fixed assets, investment real estate and inventory directly attributable to over one year construction or production to achieve its intended use or sale, the capitalization of the borrowing costs can commence only when all of the conditions are satisfied; expenditures for the asset are being incurred, borrowing costs are being incurred, and activities relating to the acquisition, construction or production of the asset that are necessary to prepare the asset for its intended use or sale have commenced. When the qualified asset under acquisition, construction or production is ready for the intended use or sale, the capitalisation of the borrowing costs shall be ceased. The amount of other borrowing costs shall be recognised in profits or losses in the current period. If the qualified asset is interrupted abnormally during construction or production, and interruption has lasted for three consecutive months, the capitalisation of the borrowing costs shall be suspended until the construction or production of a fixed assets is resumed.

The amount of interest of specific borrowings occurred for the period shall be capitalised after deducting any interest earned from depositing the unused specific borrowings in the bank or any investment income arising on the temporary investment of those borrowings during the capitalisation period. The capitalised amount of general borrowings shall be determined on the basis that the weighted average (of the excess amounts of cumulative assets expenditures over the specific borrowings) times capitalisation rate (of used general borrowings). The rate of capitalisation is determined by the weighted average interest rate of general borrowing.

77

## 23. *Right-of-use assets*

A right-of-use asset is a right to use a leased asset by the Group, as a lessee, within a lease term.

### (1) **Initial measurement**

At the commencement of a lease term, the Group initially measures a right-of-use asset at cost, which comprises the following four elements: ① the amount of lease liability initially measured; ② the lease payment made on or before the commencement date of lease term, net of any incentives received; ③ any initial expenses directly incurred, that is the incremental cost incurred to obtain the lease; ④ the costs expected to be incurred in dismantling and removing the leased asset, restoring the site on which it is located or restoring the leased asset to the condition required by the terms and conditions of the lease, unless it is incurred from the production of inventories.

### (2) **Subsequent measurement**

After the commencement date of lease term, the Group subsequently measures the right-of-use asset on a cost basis, that is to measure the right-of-use asset at cost less accumulated depreciation and accumulated impairment losses.

The Group remeasures lease liabilities according to the requirements under the standard of leases and makes corresponding adjustment to the carrying amount of right-of-use assets.

### (3) Depreciation of right-of-use assets

A right-of-use asset is depreciated from the commencement date of lease term. Generally, depreciation of a right-of-use asset starts from the month when the lease commences. The depreciation amount is charged to the cost of the right-of-use asset or profit or loss according to the use of the underlying asset.

When determining the depreciation method of a right-of-use asset, the Group considers the expected consumption of economic benefits in respect of the right-of-use asset and depreciates the asset on a straight-line basis.

In determining the useful life of a right-of-use assets, the Group follows the principles below: if it can reasonably be certain that the ownership right will be obtained upon expiry of the lease term, the right-of-use asset is depreciated over the remaining useful life; if it cannot reasonably be certain that the ownership right will be obtained upon expiry of the lease term, the right-of-use asset is depreciated over the shorter of the lease term and the remaining useful life of the right-of-use asset.

If the right-of-use asset is impaired, depreciation is made at the carrying amount of the right-of-use asset after deduction the impairment losses.

## 24. Intangible assets

### (1) Measurement method, useful life and impairment test

The Group's intangible assets mainly include land use right, maritime use right, patented technology, non-patented technology and software, etc. Intangible assets are measured at the actual costs at acquisition. For purchased intangible assets, actual paid cost and other relevant expenses are used as the actual cost. For intangible assets invested by investors, the actual cost is determined according to the values specified in the investment contract or agreement, while for the unfair agreed value in contract or agreement, the actual cost is determined at the fair value. The intangible asset, which is owned by the acquiree in a combination under different control but is not confirmed in the financial statement, shall be confirmed as intangible asset at its fair value upon the initial recognition on the acquiree's assets.

For intangible assets with definite useful lives, the Group adopts straight-line method for amortization at the month of acquisition. The Group amortises land use right, maritime use right on the basis of its useful life by straight-line method since it is acquired. The patent technology, non-patent technology and other intangible assets are amortised evenly on the basis of shorter of estimated useful life, stipulated beneficial year by contract, and legal available year. The amortisation amount is accounted into profit and loss in the current period. The Group makes the assessment on the estimated useful life and amortisation method of intangible assets with limited useful life at the end of each year. Any changes will be dealt with as changes on accounting estimates.

Those without foreseeable period to bring economic benefits to the Group due to various reasons are recognised as intangible assets with indefinite useful life. The Group will review the useful lives on those intangible assets with indefinite useful lives at each of the accounting period.

## (2) Accounting policy regarding the expenditure on the internal research and development

The Group's major research and development projects relate to tubing and casings of different models and materials.

With reference to the nature of expenditures and uncertainty of the final achievement, expenditure on an internal research and development project is classified into expenditure on the research phase and expenditure on the development phase.

From early investigations to the applications after maturity, the new product R&D projects of the Group shall undergo two phases, namely research and development. The research phase includes such stages as investigation, substantiation, the initiation and approval of annual new product R&D plans, early researches (including formula design, process design, equipment selection, formulation of technical standards, etc.), the preparation and approval of monthly new product R&D plans and so on, among which the completion of approval of monthly new product R&D plans symbolises the end of the phase of research for a new product. The development phase includes specifically such stages as trial production of the new product, project acceptance, etc., the latter of which symbolises the end of the phase of development for a new product.

Start time of the phase of development: the point when the approval of monthly new product R&D plans is completed, the early researches are completed and the formula, production process and technical standards for the product are finalised.

Expenditure at the research phase is recognised in profit or loss of the period in which it is incurred.

Expenditure on the development phase is recognised as an intangible asset when all of the following criteria are met:

- 1) it is technically feasible to complete the intangible asset so that it will be available for use or sale;
- 2) the management's intention to complete, use or sell the intangible asset;
- 3) the Group can demonstrate the ways in which the intangible asset will generate economic benefits, including the evidence of the existence of a market for the output of the intangible asset or the intangible asset itself or, if it is to be used internally, the usefulness of the intangible asset;
- 4) the availability of adequate technical, financial and other resources to complete the development and the ability to use or sell the intangible asset;
- 5) its ability to measure reliably the expenditure attributable to the intangible asset during its development phase.

Expenditure on the development phase which does not meet the above criteria is included in profit or loss of the period in which it is incurred. Expenditure in the development phase which has been included in the profit or loss in the prior period will not be recognised as asset in subsequent period. The capitalised expenditures in development phase are presented as development expenditure in the balance sheet and it is carried down into the intangible asset since the date when the asset is ready for its intended use.

## **25. Impairment of long-term assets**

The Company assesses items such as long-term equity investments, investment properties measured at cost, fixed assets, construction-in-progress, intangible assets with definite life, the Company conducts impairment test where there is any indication of impairment. Goodwill and intangible assets with indefinite useful life are tested at the end of each year for impairment, no matter there is any indication of impairment.

The recoverable amount of an asset is the higher of its fair value less costs of disposal and the present value of the future cash flows expected to be derived from the asset. An asset's fair value is the price in a sale agreement in an arm's length transaction. If there is no sale agreement but the asset is traded in an active market, fair value shall be determined based on the bid price. If there is neither sale agreement nor active market for an asset, fair value shall be based on the best available information. Costs of disposal are expenses attributable to disposal of the asset, including legal fee, relevant tax and surcharges, transportation fee and direct expenses incurred to prepare the asset for its intended sale. The present value of the future cash flows expected to be derived from the asset over the course of continued use and final disposal is determined as the amount discounted using an appropriately selected discount rate. Provisions for assets impairment shall be made and recognised for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the Group shall determine the recoverable amount of the asset group to which the asset belongs. The asset group is the smallest group of assets capable of generating cash flows independently.

When performing impairment test on goodwill that is separately presented in the financial statements, the carrying value of goodwill is allocated to the related asset groups or groups of asset groups which are expected to benefit from the synergies of the business combination. If the result of the test indicates that the recoverable amount of an asset group or group of asset groups, including the allocated goodwill, is lower than its carrying amount, the corresponding impairment loss is recognised. The impairment loss is first deducted from the carrying amount of goodwill that is allocated to the asset group or group of asset groups, and then deducted from the carrying amounts of other assets within the asset groups or groups of asset groups in proportion to the carrying amounts of assets other than goodwill.

If the carrying amount of such asset exceeds its recoverable amount after impairment test, the difference is recognised as impairment losses. The above impairment losses is irreversible in the subsequent accounting period once recognised.

## **26. Long-term deferred expenses**

The Group's long-term deferred expenses will be amortized evenly during its beneficial period, If the long-term prepayments are no longer beneficial to the subsequent accounting periods, the unamortized balance is then fully transferred to profit or loss for the current period.

## **27. Contract liabilities**

Contract liabilities represent the obligation of the Group to transfer goods to customers for the consideration which has been received or receivable from customers. Where customers have already paid the contract consideration or the Group has obtained the unconditional right to receive the contract consideration before the Group transfers the goods to customers, the amount received or receivable is recognised as contract liabilities when the customers' payment is actually made or is due, whichever is earlier.

## 28. Employee compensations

### (1) Accounting for short-term employee compensations

The Group's employee compensations include short-term compensation, post-employment benefits, termination benefits and other long-term benefits.

Short-term employee benefits include staff salaries, bonuses, allowances and subsidies, employee welfare expenditures, social security contributions (e.g. compensation insurance, work injury insurance and birth insurance), housing funds, union running costs, employee education costs, short-term paid leaves, short-term profit sharing schemes, non-monetary welfare and other short-term salaries. The Group recognises employee remuneration payables as liabilities during the accounting period in which employees render their services and included in profits or losses in the current period or related cost of assets based on the beneficiaries of the services.

### (2) Accounting for post-employment benefits

Post-employment benefits mainly include basic pension insurance, unemployment insurance and others. Based on the Company's risks and obligations, they are classified as defined contribution plans and defined benefit plans. As for the defined contribution plans, the contributions which are made for individual subjects in exchange for the staff's services rendered in the accounting period shall be recognised as liabilities on the balance sheet date and included in profit or loss of the period or relevant asset costs according to the beneficiaries. The Group has currently no defined benefit plan.

### (3) Accounting for termination benefits

The Group has currently no termination benefits.

### (4) Accounting for other long-term compensations

The Group has currently no other long-term compensations.

81

## 29. Lease liabilities

### (1) Initial measurement

The Group initially measures a lease liability at the present value of outstanding lease payments at the commencement date of the lease term.

#### 1) Lease payments

A lease payment refers to the amount paid by the Group to a lessor in relation to the right to use a leased asset during the lease term, which includes: ① the fixed payments and the substantial fixed payments, net of the lease incentive amount, if any; ② the variable lease payments depending on an index or ratio, which are determined at the time of initial measurement based on the index or ratio on the commencement date of the lease term; ③ the price of exercising the option to purchase, if the Company can reasonably be certain that it will exercise the option; ④ the amount payable to exercise the option to terminate the lease, if the lease term reflects that the Group will exercise the option to terminate the lease; ⑤ the amount payable based on the residual value of the guarantee provided by the Group.

#### 2) Discount rate

In calculating the present value of a lease payment, the Group uses the interest rate implicit in the lease as the discount rate, which is a rate that matches the sum of the present value of the lease receipts of the lessor and the present value of unguaranteed residual value with the sum of the fair value of the leased asset and the initial direct expenses incurred by the lessor.

## (2) Subsequent measurement

After the commencement date of the lease term, the Group follows the principles below for the subsequent measurement of a lease liability: ① to increase the carrying amount of the lease liability when recognizing the interest on the lease liability; ② to reduce the carrying amount of the lease liability when a lease payment is made; ③ to remeasure the carrying amount of the lease liability when there is a change in lease payment due to a change of reassessment or the lease.

The interest expenses of a lease liability in each period during the lease term based on fixed periodic interest rate are charged to the profit or loss of the current period, except those are capitalised. Periodic interest rate is the discount rate used by the Group for initial measurement of the lease liability, or the revised discount rate used by the Group when remeasuring the lease liability at the revised discount rate due to a change of lease payments or a change of the lease.

## (3) Remeasurement

After the commencement date of the lease term, the Group remeasures the lease liability based on the lease payments after the change and the revised discount rate, with a corresponding adjustment made to the carrying amount of the right-of-use asset. The carrying amount of the right-of-use asset is reduced to zero. If there is any further reduction of the lease liability, the Group charge the remaining amount to the profit or loss for the current period. ① There is a change in the substantial fixed payment; ② There is a change in projected payable of the guarantee residual value; ③ There is a change in the index or ratio used for determining the lease payment; ④ There is a change in the assessment result of the purchase option; ⑤ There is a change in the assessment result of the extension or termination option or the actual exercise of the option.

## 30. Provisions

82

A provision is recognised as a liabilities when an obligation related to a contingency, such as guarantees provided to outsiders, pending litigations or arbitrations, product warranties, redundancy plan, onerous contract, reconstructing, expected disposal of fixed assets, satisfied all of the following conditions: the obligation is a present obligation of the Group; it is probable that an outflow of economic benefits will be required to settle the obligation; and the amount of the obligation can be measured reliably.

A provision shall be initially measured at the best estimate of the expenditure required to settle the related present obligation. Considering the factors, such as risk, uncertainties, and time value of money related to the contingencies. Where the effect of the time value of money is material, the best estimate shall be determined by discounting the related future cash outflows. Where discounting is used, the increase in the provision due to the passage of time is recognised as an interest expense.

If all or part of the expense necessary for settling the provisions is expected to be compensated by the third party, the amount of compensation is separately recognised as an asset when it is basically determined to be recoverable, and the recognised amount of the compensation shall not exceed the carrying amount of the provisions.

The Group reviews the carrying amount of provisions at the balance sheet date and makes appropriate adjustments to reflect the current best estimate.

### 31. Safety Production Fee

The Group collects, utilises and reviews the safety production fee pursuant to the relevant requirements of Notice of the Ministry of Finance and the State Administration of Work Safety on Issuing the Administrative Measures for the Collection and Utilisation of Enterprise Work Safety Funds (No. 16 [2012] of the Ministry of Finance and the State Administration of Work Safety) and Notice of the Ministry of Finance on Issuing Interpretation No. 3 of the Accounting Standards for Business Enterprises (No. 8 [2009] of the Ministry of Finance).

The provision of Group's machinery production enterprise safety production costs is based on the actual sales revenue in last year, which is extracted monthly by taking excess regressive manner in accordance with the following standard. The provision will be used for enhancing and improving safe production conditions of enterprises or projects.

- (1) Operating income of RMB10 million and below, accrued in accordance with 2%;
- (2) Operating income of RMB10 million to RMB100 million (inclusive), accrued in accordance with 1%;
- (3) Operating income of RMB100 million to RMB1,000 million (inclusive), accrued in accordance with 0.2%;
- (4) Operating income of RMB1,000 million to RMB5,000 million (inclusive), accrued in accordance with 0.1%;
- (5) Operating income above RMB5,000 million, accrued in accordance with 0.05%.

The provision of the safety production fee for newly established enterprises and machinery production enterprise with production less than one year is based on actual sales revenue for the year. The provision is accrued monthly.

The provision of safety production fee is recognised in profit and loss for the current period and "special reserve" account shown separately under owner's equity. When using the reserve for maintaining safety production fee, the amount will be debited from the "special reserve" if the fee is expenses nature. When using the reserve for maintaining safety production fee of fixed asset, the amount will be debited from the "construction-in-progress" item for the amount recorded in the cost of related assets. When the status of the project is ready for intended use, the costs of such safety production fee should be recognised as fixed assets. Meanwhile, "special reserve" will be offset by the cost forming fixed asset. If the balance of "special reserve" is inadequate for offsetting purpose, the safety production fee will be recognised in profit and loss for the current period.

83

### 32. Revenue

Accounting policy adopted for revenue recognition and measurement

The Group's operating revenue is mainly comprised of revenue from sale of goods, revenue from provision of services and interest income.

#### (1) Principles of revenue recognition

Revenue is recognised when the Group satisfies the performance obligation in the contract by transferring the control over relevant goods or services to the customers.

Where a contract has two or more performance obligations, the Group determines the stand-alone selling price at contract inception of the distinct good or service underlying each performance obligation in the contract and allocates the transaction price in proportion to those stand-alone selling prices. The Group recognises as revenue the amount of the transaction price that is allocated to each performance obligation.

The transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties. The Group recognises the transaction price only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is subsequently resolved. The consideration which the Group expects to refund to the customer is recognised as liabilities and excluded from transaction price. Where the contract contains a significant financing component, the Group recognises the transaction price at an amount that reflects the price that a customer would have paid for the promised goods or services if the customer had paid cash for those goods or services when (or as) they transfer to the customer. The difference between the amount of promised consideration and the cash selling price is amortised using an effective interest method over the contract term. The Group does not adjust the consideration for any effects of a significant financing component if it expects, at contract inception, that the period between when the Group transfers a promised good or service to a customer and when the customer pays for that good or service will be one year or less.

The Group satisfies a performance obligation over time if one of the following criteria is met; or otherwise, a performance obligation is satisfied at a point in time:

- 1) the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs.
- 2) the customer can control the asset created or enhanced during the Group's performance.
- 3) the Group's performance does not create an asset with an alternative use to it and the Group has an enforceable right to payment for performance completed to date.

For performance obligation satisfied over time, the Group recognises revenue over time by measuring the progress towards complete satisfaction of that performance obligation, which is determined by input method. When the outcome of that performance obligation cannot be measured reasonably, but the Group expects to recover the costs incurred in satisfying the performance obligation, the Group recognises revenue only to the extent of the costs incurred until such time that it can reasonably measure the outcome of the performance obligation.

For performance obligation satisfied at a point in time, the Group recognises revenue at the point in time at which the customer obtains control of relevant goods or services. To determine whether a customer has obtained control of goods or services, the Group considers the following indicators:

- 1) the Group has a present right to payment for the goods or services.
- 2) the Group has transferred the legal title of the goods to the customer.
- 3) the Group has transferred physical possession of the goods to the customer.
- 4) the Group has transferred the significant risks and rewards of ownership of the goods to the customer.
- 5) the customer has accepted the goods or services.

The Group's right to consideration in exchange for goods or services that it has transferred to a customer is stated as contract asset. The Group recognises allowances for impairment loss for expected credit loss on contract assets. Receivable is the Group's unconditional right to consideration to be received from a customer. A contract liability is the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer.

(2) Specific accounting policies related to the main activities of the Company's revenue are described below:

① *Contracts for sale of goods*

Contracts for sale of goods between the Group and its customers usually include only the performance obligations in respect of the transfer of goods. In general, the Group recognises revenue at the point in time when the customer accepts the control of the goods, taking into full consideration of the following factors: obtaining the present right to receiving payment in respect of the goods; transfer of substantial risks and returns in respect of the title to the goods; transfer of legal title in respect of the goods; transfer of the physical asset of the goods; and the acceptance of goods by customers.

② *Contracts for provision of services*

Contracts for provision of services between the Group and its customers usually contain performance obligations such as technical services and after-sale maintenance services. While the Group performs the contract, the customer obtains and consumes the economic benefit brought by the Group's performance, and in respect of the portion of revenue arising from the Group's performance completed to date, the Group is entitled, during the entire validity period of the contract, to recognise revenue according to progress of performance within such period for satisfying such performance obligations during a period of time, however other than circumstances that the progress of performance cannot be reasonably determined. The Group determines progress of performance in respect of the provision of services using input method. When the progress of performance cannot be reasonably determined, if the costs incurred are expected to be compensated, the Group recognises revenue based on the amount of costs incurred, until the progress of performance can be reasonably determined.

### 33. Government grants

85

The Group's government grants include financial funding, interest subsidy for loans and tax rebates, of which government grants related to assets represent the government grants obtained by the Group and applied towards acquiring and constructing or otherwise develop long-term assets. Government grants related to income represent the government grants other than those related to assets. If no grantee is specified in the government documents, the Group shall determine based on the above classification principles, otherwise, it is classified as a government grant related to income in its entirety.

If a government grant is a monetary asset, it is measured at the amount actually received. For the grants being allocated in accordance with fixed quotas, or if there is sufficient evidence at end of the year to show that the entity complies with the conditions of financial policies and is expected to receive supporting funds, the grants shall be measured at receivable amount. If a government grant is a non-monetary asset, it is measured at its fair value, and in the event the fair value cannot be acquired in a reliable way, it is measured at its nominal amount (RMB1).

Government grants related to assets are recognised as deferred income and are allocated evenly to profit or loss for the period over the useful life of the relevant asset. The balance of undistributed deferred income of a related asset which is disposed, transferred, retired or damaged before the end of its useful life is transferred to gain or loss of disposal of assets for the period.

If a government grant related to income is to compensate the related cost, expenses or losses to be incurred in subsequent periods, it is recognised as deferred income, and is recognised in profit or loss for the period when the related cost, expenses or losses incurred. If a government grant is related to the ordinary activities, it is included in other income based on the economic substance of the business. Government grants not related to the ordinary activities are included in non-operating income or expenses.

Interest subsidies for policy-related preferential loans obtained by the Group are classified as interest subsidy funds paid to lending banks or interest subsidy funds directly paid to the Group, which are accounted for based on the following principles:

- (1) For interest subsidy funds paid to lending banks, the lending banks provide loans to the Group at policy-related preferential rates, and the Group recognises the borrowing amount actually received as the book value of the borrowing, and calculates the relevant borrowing expenses based on the principal and the policy-related preferential rate of the borrowing.
- (2) For interest subsidy funds paid directly to the Group, the Group will offset the corresponding interest subsidy against the relevant borrowing expenses.

For government grants recognised that needs to be returned, the Group accounts the returning amount in the period according to the following:

- 1) Where it has been offset against the carrying value of the relevant asset on initial recognition, the carrying value of the asset is adjusted.
- 2) Where relevant deferred income exists, the balance of the carrying amount of the relevant deferred income is offset and the excess is recognised in profit or loss for the period.
- 3) In other cases, it is directly recognised in profit or loss for the period.

#### **34. *Deferred income tax assets/deferred income tax liabilities***

Deferred income tax assets and deferred income tax liabilities of the Group are calculated and recognised based on the difference between tax bases and carrying amounts of assets and liabilities (temporary differences). Deferred income tax asset is recognised for the deductible losses that are deductible against taxable profit in subsequent years in accordance with the requirements under tax laws. No deferred tax liability is recognised for temporary difference arising from initial recognition of goodwill. No deferred income tax asset or deferred income tax liability is recognised for a temporary difference arising from initial recognition of asset or liability due to a transaction other than a business combination, which affects neither accounting profit nor taxable profit (or deductible loss). At balance sheet date, deferred income tax assets and deferred income tax liabilities are measured at the applicable tax rates for the period when the asset is expected to be realised or the liability is expected to be settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available to deduct from the deductible temporary difference, deductible losses and tax credits.

#### **35. *Leases***

##### **(1) Identification of leases**

A lease is a contract under which the lessor conveys the right to use an asset to the lessee for a period of time in exchange for consideration. At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of one or more identified assets for a period of time in exchange of consideration. To determine whether a contract conveys the right to control the use of an identified asset, the Group assesses whether the lessee has the right to obtain substantially all of the economic benefits from the use of the identified asset throughout the period of uses, and also whether the lessee has the right to direct the use of the identified asset.

For a contract that contains multiple lease components, the Group separates the contract and accounts for each lease component as a lease separately. For a contract that contains lease and non-lease components, the Group separates and accounts for the lease and non-lease components.

## (2) The Group as a lessee

The Group recognises a right-of-use asset and a lease liability at the commencement date of the lease term. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability, the lease payments made at or before the commencement date of the lease term (net of any lease incentives received), any initial direct costs incurred and an estimate of costs expected to be incurred in dismantling and removing the lease asset or restoring the site on which the lease asset is located, or restoring the lease asset to the condition required by the terms and conditions of the lease.

As a lessee, the Group recognises right-of-use assets and lease liabilities for leases.

### 1) *Modifications of leases*

Modifications of leases refer to the changes in the lease scope, lease consideration, and lease term other than the original contract terms, including the addition or termination of the rights of use of one or more leased assets, and the extension or shortening of the lease term stipulated in the contract. The effective date of the modifications of leases is a date fixed for the modification of the lease as agreed by both parties.

If a modification of lease happens and meets the following conditions, the Group accounts for the modification of lease as a separate lease: ① the modification of lease expands the scope of lease by adding right of use of one or more leased assets; ② the increased consideration and the standalone price of the expanded part of lease are equivalent after adjustment is made based on the contract.

If the modification of lease is not accounted for as a separate lease, on the effective date of the modification of lease, the Group allocates the consideration of the modified contract in accordance with the accounting standard in respect of leases and re-determines the lease term after modification; and discount the lease payments after modification at the discount rate after modification for remeasurement of lease liability. When calculating the present value of the lease payment after modification, the Group uses the interest rate implicit in lease of the remaining lease term as the discount rate. If the interest rate implicit in lease of the remaining lease term cannot be determined, the Group uses lessee's incremental borrowing rate at the effective date of the modification of the lease as the discount rate. The Group accounts for the consequences of the above adjustment under the following circumstances: ① If the modification of lease results in a narrower scope of lease or a shorter lease term, the lessor reduces the carrying amount of the right-of-use asset to reflect the gain or loss on partly or wholly termination of the lease in the profit or loss of the current year. ② For other modifications of lease that result in remeasurement of lease liability, the lessee made corresponding adjustment to the carrying amount of the right-of-use asset.

### 2) *Short-term leases and leases of low-value assets*

For short-term leases with lease term of less than 12 months and leases of a single lease asset which is of relatively low value when it is new, the Group has elected not to recognize right-of-use asset and lease liability. The Group charges the lease payments of short-term leases and the low-value asset leases to the cost of the underlying assets or the profit or loss for the current period in each period of the lease term on a straight-line basis.

### (3) The Group as a lessor

On the basis of determining the contract is or contains a lease as mentioned in (1), the Group, as a lessor, classifies the lease as finance lease and operating lease at the inception of the lease.

If a lease transfers, in substance, substantially all of the risks and rewards of the ownership of the leased asset, the lessor classifies the lease as finance lease. Other than that, all leases are classified as operating leases.

A lease is usually classified as a finance lease by the Group when one or more of the following conditions are satisfied: ① When the lease term expires, the ownership of the leased asset is transferred to the lessee; ② The lessee has the option to purchase the leased asset. The purchase price entered into is sufficiently low compared to the fair value of the leased asset when the option is expected to be exercised. Therefore, it can be reasonably certain at the commencement date of the lease that the lessee will exercise the option; ③ The ownership of the asset is not transferred, but the lease term takes up most of the useful life of the leased assets (not less than 75% of the useful life of the leased asset); ④ On the commencement date of the lease, the present value of the lease receipt is basically equivalent to the fair value of the leased asset (not less than 90% of the fair value of the leased asset); ⑤ The leased assets are of a special nature. If no major modifications are made, it can only be used by the lessee. If one or more of the following indications exist in a lease, the Group may also classify it as a finance lease: ① If the lessee cancels the lease, the loss of the lessor arising from the cancellation of lease is borne by the lessee; ② The gain or loss arising from the fair value change in the balance of the asset belongs to the lessee; ③ The lessee is able to continue the lease for the next period at a rent far below the market level.

#### 1) *Accounting for operating leases*

##### Initial measurement

At the commencement date of the lease, the Group recognises the finance lease receivables for finance leases and derecognises finance lease assets. On initial measurement of finance lease receivables, the net lease investment is used to record the value of the finance lease receivable.

The net lease investment is the sum of the unguaranteed residual value and the present value of outstanding lease receipts at the commencement date of the lease term (discounted by the interest rate implicit in the lease). A lease receipt is the payment receivable from the lessee by the lessor for conveying the right to use a leased asset within the lease period, which comprises: ① the fixed payments and the substantial fixed payments to be made by the lessee, net of the lease incentive amount, if any; ② the variable lease payments depending on an index or ratio, which are determined at the time of initial measurement based on the index or ratio on the commencement date of the lease term; ③ the price of exercising the option to purchase, provided that it is reasonably certain that the lessee will exercise the option; ④ the amount payable by the lessee for exercising the option to terminate the lease, provided that the lease term reflects that the lessee will exercise the option to terminate the lease; ⑤ the residual value of the guarantee provided by the lessee, its related party and an independent third party having financial capability to fulfil the obligation under the guarantee.

##### Subsequent measurement

The Group calculates and recognises interest income in each period during the lease term based on fixed periodic interest rate. Periodic interest rate is the implicit discount rate used to determine the net lease investment (For sub-leases where the implicit interest rate cannot be determined, the discount rate of the original lease is used (adjusted by any initial direct expenses in relation to the sub-lease), or the revised discount rate fixed when the modification of the finance lease is not treated as a separate lease and the leased is classified as finance lease in accordance with the relevant requirement with the criteria are satisfied had the modification take effect on the commencement date of the lease.

#### Accounting for lease modifications

If the finance lease is modified and meets the following conditions, the Group accounts for the modification as a separate lease: ① The modification expands the lease scope by adding right to use of one or more leased assets; ② The increased consideration is equal to the standalone price of the expanded lease scope as adjusted based on the contract.

If the modification of finance lease is not accounted for as a separate lease, and it satisfies the criteria of classification of the lease as an operating lease had the modification takes effect on the lease commencement date, the Group accounts for the lease modification as a new lease since the effective date of the lease modification, with the net lease investment prior to the effective date of the lease modification as the carrying amount of the leased asset.

#### 2) *Accounting for operating leases*

##### Treatment of rents

In each period during the lease term, the Group recognises lease receipts from operating lease as rental income on a straight-line basis.

##### Incentive measures provided

For rent-free period, the Group allocates the total rent over the lease term without deducting rent-free period on a straight-line basis, and recognises rental income during the rent-free period. If the Group bears certain expenses on behalf of the lessee, such expenses are deducted from the rental income and the balance of rental income after deduction is allocated over the lease term.

##### Initial direct expenses

The initial direct expenses incurred by the Group in relation to the operating leases are capitalised as cost of the leased asset, and equally charged to the profit or loss for the current period over the lease term in accordance with the same basis of recognition as rental income.

##### Depreciation

For the fixed assets in operating lease assets, they are depreciated using the policy similar to the depreciation of assets. For other operating lease assets, they are amortised on a systematic and reasonable manner.

##### Variable lease payments

The variable lease payments received by the Group that have not included in lease receipts relating the operating leases are credited to the profit or loss of the current period when they occur.

##### Modifications of operating leases

A modification of operating lease is accounted for by the Group as a new lease since its effective date. Any prepaid lease payments or lease receivables relating to the modification is treated as a receipt for new lease.

### 36. *Other significant accounting policies and accounting estimates*

#### **Accounting for income tax**

Income tax is accounted for using liability method. Income tax expenses represent the sum of current tax and deferred tax. Current tax and deferred tax relating to the transactions or matters that are directly recorded in shareholders' equity are dealt with in shareholders' equity. Deferred tax arising from business combination is adjusted to the carrying value of goodwill. All other current tax and deferred tax are recognised in profit or loss for the period.

The tax currently payable is the amount of tax payable to taxation bureau by the enterprises in respect of the transactions and matters of the current period calculated according to the taxation regulations. The deferred income tax is the difference between the balances of the deferred income tax assets and deferred tax liabilities that should be recognised using the balance sheet liabilities approach at the end of period and their balances originally recognised.

#### **Segment information**

The Group's operating segments are identified based on internal organisation structure, management requirements and internal reporting system. The reportable segments are determined and disclosed based on the operating segments.

Operating segment is a component of the Group that satisfies the following criteria simultaneously: the component can generate revenue and expenses in business activities; the management of the Group can assess the operating performance of the component in order to allocate resources and assess performance; and the Group can acquire accounting information such as the financial position, operating performance and cash flow of the component. If two or more operating segments carry similar economic characteristics, and satisfy certain criteria, they are combined as one operating segment.

#### **Discontinued operations**

Discontinued operations refer to components of the Group which satisfy any of the following conditions and can be individually distinguished, and such components have been disposed of or classified as available-for-sale: (1) the components represent an independent major business or a separate major region of operation; (2) the components are part of an intended disposal plan related to an independent major business or a separate major region of operation; (3) the components are subsidiaries acquired specifically for resale.

### 37. *Changes in significant accounting policies and accounting estimates*

#### **(1) Changes in significant accounting policies**

Applicable  Not applicable

#### **(2) Changes in significant accounting estimates**

Applicable  Not applicable

#### **(3) Financial Statements line items at the beginning of the year when the New Revenue Standard is implemented for the first time and the amendments to the New Lease Standard is implemented for the first time since 2020**

Applicable  Not applicable

#### **(4) Retrospective adjustments to the comparative figures for prior period upon implementation of the New Revenue Standard and the New Lease Standard for the first time since 2020**

Applicable  Not applicable

## VI. Taxation

### 1. Main tax types and tax rates

Type	Calculation basis	Rate
Value-added tax	Value-added tax payable is the balance of output tax after deducting deductible import tax	13%
Urban maintenance and construction tax	Turnover tax actually paid	7%
Enterprise income tax	Taxable profits	15%, 16.5%, 25%

Total	429,135,938.49	76.37%	—

(5) Account receivables derecognised on transfer of financial assets

As at 30 June 2020, the Group had no accounts receivable derecognised on the transfer of financial assets.

(6) Amount of assets or liabilities arising from transfer of accounts receivable and continuous involvement

As at 30 June 2020, the Group had no assets or liabilities arising from transfer of accounts receivable and continuous involvement.

Other information:

As at 30 June 2020, the Group had no accounts receivable that restricted for use as they have been applied to the factoring of loans.

4. *Financing receivables*

Item	Unit: RMB	
	Balance at the end of the period	Balance at the beginning of the period
Bank acceptance bills	<b>11,945,280.78</b>	96,155,523.75
Total	<b>11,945,280.78</b>	96,155,523.75

Increase or decrease movements and fair value changes of financing receivables during the period

Applicable  Not applicable

The Group uses the carrying amount of the bank acceptance bills as their fair value due to their short remaining terms and their carrying amount approximates to their fair value.

If provision for impairment of financing receivables was made using the general approach of expected credit loss, please disclose the information on provision for impairment with reference to the disclosures of other receivables:

Applicable  Not applicable

No provision for asset impairment was made by the Group as the acceptors of the bank acceptance bills it holds are all financial institutions with good credit standing.

Other information:

- (2) Information on foreign operating entities, including disclosures of the overseas principal place of business of significant foreign operating entities, their respective reporting currency and basis for selection, and the reason(s) for any changes in the reporting currency.

Applicable  Not applicable

MPM, a controlled subsidiary of the Company (having 90% of its shareholdings and voting rights) is domiciled and principally operates in Hong Kong and its reporting currency is USD.

## 57. Government grants

- (1) General information of government grants

Unit: RMB

Type	Amount	Presented as	Amount included in profit or loss for the current period
Stability subsidies	569,548.00	Other income	569,548.00
Others	32,402.96	Other income	32,402.96
Total	601,950.96	—	601,950.96

- (2) Refunds of government grants

Applicable  Not applicable

Other information:

The Group had no refund of government grants during the period.

137

## VIII. Changes in scope of consolidation

### 1. Changes in scope of consolidation due to other reasons

Specify the change in scope of consolidation due to other reasons (e.g. incorporation of a new subsidiary, liquidation of a subsidiary) and its details:

During the reporting period, two subsidiaries, namely Maolong Recycle and Wendeng Baolong, were excluded from the scope of consolidation.

On 29 October 2019, the fifth meeting of the sixth session of the board of directors of the Company considered and passed a "Resolution on the deregistration of wholly-owned subsidiaries" (《關於註銷全資子公司的議案》), which proposes to dispose Shouguang Maolong Old Metals Recycle Co., Ltd. and Wendeng Baolong Recyclable Resource Co., Ltd., wholly-owned subsidiaries of the Company, by way of liquidation and deregistration (Announcement number : 2019-029). On 24 December 2019, the Company received a notice from the Administrative Examination and Approval Service Bureau under the Administration for Market Regulation of Wendeng District of Weihai City, notifying that the procedures for deregistering Wendeng Baolong have been completed (Announcement number: 2019-039). On 18 February 2020, the Company received from Shouguang Administrative Examination and Approval Service Bureau a notice of deregistration approval, notifying that the procedures for deregistering Maolong Recycle have been completed (Announcement number: 2020-002).

## IX. Interests in other entities

### 1. Interests in subsidiaries

#### (1) Structure of the business group

Differences between proportions of shareholdings and voting rights in subsidiaries:

Name of subsidiary	Form of business	Principal place of operation	Place of registration	Business nature	Registered capital	Percentage of shareholding		Method of acquisition
						Direct	Indirect	
MPM	Limited company	Hong Kong	Hong Kong	Trading	USD100 ten thousand	90.00%	0.00%	Merger and acquisition
Shouguang Maolong	Limited liability company	Shouguang	Shouguang	Manufacturing	RMB71,238 ten thousand	100.00%	0.00%	Merger and acquisition
Molong Electro-mechanical	Limited liability company	Shouguang	Shouguang	Manufacturing	USD100 ten thousand	0.00%	100.00%	Merger and acquisition
Shouguang Baolong	Limited liability company	Shouguang	Shouguang	Manufacturing	RMB15,000 ten thousand	70.00%	0.00%	Establishment by investment
Weihai Baolong	Limited liability company	Weihai	Weihai	Manufacturing	RMB2,600 ten thousand	61.54%	38.46%	Merger and acquisition
Molong Logistic	Limited liability company	Shouguang	Shouguang	Services	RMB300 ten thousand	100.00%	0.00%	Establishment by investment
Molong I&E	Limited liability company	Shouguang	Shouguang	Import and export	RMB1,000 ten thousand	100.00%	0.00%	Establishment by investment
Baolong Consultancy	Limited liability company	Shouguang	Shouguang	Services	RMB15,000 ten thousand	0.00%	50.00%	Merger and acquisition
Molong Energy	Limited liability company	Shouguang	Shouguang	Services	RMB1,000 ten thousand	51.00%	0.00%	Establishment by investment

As at 30 June 2020, none of the subsidiaries of the Company has issued any share capital or debt securities.

Basis for holding less than half of voting rights but retaining control over investees, and holding more than half of voting rights but not having control over investees:

The Group was the largest shareholder of Baolong Consultancy holding 50% equity interest. The other six shareholders were all natural persons and their shareholdings were dispersed (at a percentage of 10% or 6.67%). As stipulated in the articles of association of Baolong Consultancy, for a resolution proposed at board meeting, each person can cast one vote. A board resolution shall be passed by a majority of directors. The company had 3 directors, all of them were appointed by the Group. The Group had effective control over Baolong Consultancy, and therefore, it was included within the scope of consolidation.

#### (2) Significant non-wholly owned subsidiaries

Unit: RMB

Name of subsidiary	Shareholding percentage of minority shareholders	Profit and loss attributable to minority shareholders for the current period	Dividends declared to minority shareholders for the current period	Balance of minority interests at the end of the period
Shouguang Baolong	30.00%	(16,655,585.58)	—	(47,776,238.29)
Baolong Consultancy	50.00%	2,151,280.54	—	74,908,503.20
Total	—	(14,504,305.04)	—	27,132,264.91

(3) Key financial information of significant non-wholly owned subsidiaries

Unit: RMB

Name of subsidiary	Balance at the end of the period		Balance at the beginning of the period		Non-current liabilities	Total liabilities	Current assets	Non-current assets	Total assets	Current liabilities	Non-current liabilities	Total liabilities
	Current assets	Non-current assets	Total assets	Current liabilities								
Shouguang Baolong	842,396,110.46	450,703,088.77	1,293,099,199.23	1,371,718,576.90	0.00	1,371,718,576.90	513,557,768.92	464,035,585.79	977,593,354.71	1,018,236,789.18	—	1,018,236,789.18

(4) Major restrictions on using of assets and settling debts of the business group

Nil

(5) Provision of financial or other supports for structured entities consolidated into the consolidated financial statements

Nil

2. *Transactions resulting in changes in share of owners' equity of subsidiaries with control over subsidiaries retained*

(1) Details of the changes in share of owners' equity of subsidiaries

Nil

3. *Interests in joint arrangements or associates*

(1) Significant restrictions on the ability of joint ventures or associates to transfer funds to the Company

There were no significant restrictions on the ability of associates to transfer funds to the Company.

(2) Excessive losses incurred by joint ventures or associates

None of the associates incurred any excessive losses.

(3) Unrecognised commitments associated with investment in joint ventures

The Group had no unrecognised commitments associated with investment in joint ventures.

(4) Contingent liabilities associated with investment in joint ventures or associates

The Group had no contingent liabilities associated with investment in joint ventures.

140

4. *Interest in structured entities not consolidated in the consolidated financial statements*

Information on structured entities not consolidated in the consolidated financial statements:

The Group had no structured entities not consolidated in the consolidated financial statements.

## X. Risks associated with financial instruments

The Group's major financial instruments include borrowings, accounts receivable, accounts payable and others. Detailed information about these financial instruments are set out in note VI. The risks associated with these financial instruments and the risk management policies adopted by the Group to mitigate such risks are described below. Management of the Group manages and monitors these risk exposures to ensure such risks are contained within a prescribed scope.

### 1. Objectives and policies of risk management

The Group engages in risk management with the aim of achieving an appropriate balance between risk and revenue, where the negative effects of risks against the Group's operating results are minimised, with a view to maximise the benefits of shareholders and other stakeholders. Based on such objective of risk management, the underlying strategy of the Group's risk management is to ascertain and analyse all types of risks exposures of the Group, establish appropriate risk tolerance thresholds, carry out risk management procedures and perform risk monitoring on all kinds of risks in a timely and reliable manner, thus containing risk exposures within a prescribed scope.

#### (1) Market risks

##### 1) Foreign exchange risk

Foreign exchange risk represents risks of loss incurred as a result of changes in exchange rate. The Group is mainly exposed to foreign exchange risks in connection with USD, HKD and EUR, except for the parent company and its subsidiaries MPM of the Group which entered purchases and sales in USD, EUR and HKD, other principal operating activities of the Group are settled in RMB. As at 30 June 2020, except for the USD balances in assets and liabilities, odd monies in EUR and HKD balances as set out below, all balances of assets and liabilities of the Group were denominated in RMB. The foreign exchange risk arising from these assets and liabilities in USD balances may affect the operating results of the Group.

Unit: RMB

Item	30 June 2020	31 December 2019
Monetary funds — USD	<b>172,174,324.81</b>	116,873,789.09
Monetary funds — EUR	<b>2.95</b>	2.89
Accounts receivable — USD	<b>158,366,434.93</b>	148,370,657.42
Accounts receivable — EUR	<b>1,109,408.17</b>	1,086,523.61
Short-term borrowings — USD	<b>35,397,500.00</b>	34,881,000.00
Accounts payable — USD	<b>10,547,742.24</b>	31,540,777.37
Contract liabilities — USD	<b>3,764,081.80</b>	—
Interest payables — USD	<b>38,167.35</b>	—

The Group closely monitors the effect of changes in foreign exchange rates on the Group.

The Group has always placed its concern on the research of foreign exchange risk management policies and strategies. It maintains close co-operation with financial institutions engaging in foreign exchange business, and arranges favourable settlement terms in contracts to reduce foreign exchange risk. Meanwhile, with the continuous increase in the proportion of international market, if risks beyond the control of the Group, such as the appreciation of RMB, the Group will mitigate such risk via suitable adjustment of sales strategies.

2) *Interest rate risk*

Interest rate risk refers to the risk that the fair value or future cash flow of a financial instrument will fluctuate because of the changes in market interest rate. The Group's interest rate risk arises from interest-bearing liabilities, such as borrowings from financial institutions. Financial liabilities issued at floating rate expose the Group to cash flow interest rate risk. Financial liabilities issued at fixed rate expose the Group to fair value interest rate risk. The Group determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions. As at 30 June 2020, the Group's interest-bearing liabilities were mainly floating-rate loan contracts denominated in RMB amounting to RMB318,000,000.00 (31 December 2019: RMB594,800,000.00) and fixed-rate loan contracts denominated in RMB and USD amounting to RMB2,347,266,614.76 (31 December 2019: RMB1,875,393,674.86).

The Group's risk of changes in fair value of financial instruments resulted from the changes in interest rates was mainly associated with fixed-rate bank loans. The Group aims at maintaining these fixed-rate bank loans at floating rates.

The Group's risk of changes in cash flow of financial instruments resulted from the changes in interest rates was mainly associated with floating-rate bank loans. The Group's policy is to maintain these loans at floating rates, so as to eliminate fair value risks arising from changes in interest rate.

The Company designs rationally credit lines, various credit types and the term of credit lines through the establishment of good relations between banks and enterprise to ensure sufficient bank line of credit and meet the Company's various types of needs for short-term financing. Meanwhile, the Company reduce rationally risk of interest rate fluctuations by shortening the duration of a single borrowing and special agreement on early repayment terms.

3) *Price risk*

The Group sells steel products at market prices. Therefore, it is vulnerable to the fluctuation of these price.

(2) **Credit risk**

As at 30 June 2020, the maximum credit risk exposure that may cause financial loss to the Group mainly derived from the loss on financial assets of the Group due to the failure of performing obligations by contract counterparties. Specifically:

The book value of the financial asset which has been recognised in the consolidated balance sheet; in respect of financial instruments that are measured by fair value, the book value reflects its risk exposure, but not its biggest risk exposure, the biggest risk exposure will change as the future fair value changes.

In order to minimise the credit risk, the Group conducts a review on the determination and approval of credit limits, and carries out other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual trade debt at each balance sheet date to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the management of the Company considers that the Group's credit risk is significantly reduced.

The Group maintains its working capital with reputable banks. Therefore, the credit risk for such is minimal.

The Group has adopted necessary policies to ensure that all the trade customers have good credit history. Apart from the top five accounts receivable, the Group has no other significant concentration of credit risk.

### (3) Liquidity risk

The liquidity risk is the Group's impossibility to perform its financial obligations after the maturity date. In the management of the liquidity risk, the Group monitors and maintains a level of working capital deemed adequate by the management to perform the Group's obligations, thus will not cause loss or damage to the reputation of the Group. Moreover, the Group analyses its debt structure and deadline regularly and maintains sufficient fund. The management monitors the utilisation of bank borrowings and ensures compliance with loan covenants. Meanwhile, the management keeps in touch with financial institutions and makes consultations on financing issues, to maintain enough credit limits and mitigate liquidity risk.

The Group considers borrowings from financial institutions as a main source of funds. As at 30 June 2020, the Group had unutilised credit facilities provided by financial institutions of RMB485,470,000.00 (31 December 2019: RMB449,000,000.00), of which the unutilised short-term bank borrowings of the Group amounted to RMB395,470,000.00 (31 December 2019: RMB399,000,000.00).

Analysis of the financial assets and financial liabilities held by the Group based on the maturity of undiscounted remaining contractual obligations is as follows:

Amount at 30 June 2020:

	Unit: RMB				
Item	Within 1 year	1 to 2 years	2 to 5 years	Over 5 years	Total
Financial assets					
Monetary funds	707,917,691.75	—	—	—	707,917,691.75

Long-term payables	—	25,649,134.05	—	—	25,649,134.05

## 2. Sensitivity analysis

The Group applies sensitivity to analyse the rationality of technical risk variables and the effects of possible changes on profit and loss or shareholders' equity. As any risk variable seldom varies, and correlation among variables will play a major role in the ultimate amount of a special risk variable. Therefore, the followings are carrying out on the assumed condition that each variable change independently.

### (1) Sensitivity analysis of foreign exchange

The assumption for analysing sensitivity to foreign exchange risk: all hedges of net investment in foreign operations and cash flow hedges are highly effective.

Based on the above assumption, with all other variables held constant, the post-tax effects of possible reasonable changes in exchange rates on profit and loss and equity for the current period are set out below:

Unit: RMB

Item	Change in exchange rate	30 June 2020		2019	
		Effect on net profit	Effect on owners' equity	Effect on net profit	Effect on owners' equity
All foreign currencies	5% appreciation against RMB	<b>14,095,158.28</b>	<b>14,095,158.28</b>	8,496,140.81	8,496,140.81
All foreign currencies	5% depreciation against RMB	<b>(14,095,158.28)</b>	<b>(14,095,158.28)</b>	(8,496,140.81)	(8,496,140.81)

## XI. Fair value disclosures

144

As at 30 June 2020, the Group's financing receivables were measured at fair value. As the related bank acceptance bills had short maturities, the difference between their fair value and carrying amount was minimal.

The Group's financial assets and liabilities not measured at fair value mainly included: accounts receivable, short-term borrowings, accounts payable and long-term borrowings. The difference between the book value and fair value of financial assets and liabilities not measured at fair value was immaterial.

## **XII. Related parties and related party transactions**

### **1. Parent company of the Company**

The ultimate controller of the Company is Zhang En Rong.

Other information:

As at 30 June 2020, Mr. Zhang En Rong owned 29.53% voting shares of the Company, and was the controlling shareholder and the ultimate controller of the Company.

### **2. Subsidiaries of the Company**

Particulars of the subsidiaries of the Company are set out in note IX.1.

### **3. Joint ventures and associates of the Company**

Details of the significant joint ventures or associates of the Company are set out in note IX.3.

The following joint ventures or associates entered into related party transactions with the Company during the current period or had balances of related party transactions with the Company from the prior period :

### 2. Sales Returns

As at the date of the financial report, the Group had no significant sales returns.

### 3. Other events subsequent to balance sheet date

The Group had no other significant events subsequent to the balance sheet date.

## XVI. Other important matters

### 1. Segment information

#### (1) Basis for determining reportable segments and accounting policies

##### 1) Basis for determining reportable segments

Based on its internal organisational structure, management requirements and internal reporting system, the Group's operating businesses are divided into six reportable segments. These reportable segments have been determined on the basis of internal organisational structure, management requirements and internal reporting system. Management of the Group regularly evaluates the operating results of these reportable segments to make decision about resources to be allocated to these segments and assess their performances. The main products of each of the Group's reportable segments include casing, three kinds of pumping units, petroleum machinery parts, tube blanks, high-end castings and forgings, and others.

##### 2) Accounting policies for the reportable segments

Segment reporting information is disclosed in accordance with the accounting policies and measurement standards adopted for reporting to the management by each segment, which are consistent with the accounting policies and measurement basis for preparing financial statements.

## (2) Financial information of reportable segments
